Dear Small Municipal Provider:

This is an OFFICIAL NOTICE that the Director of the Arizona Department of Water Resources (Director) has issued a Final Order adopting the management plan for the Tucson Active Management Area (TAMA) for the fourth management period, (4MP). This is also an Official Notice of the conservation requirements, distribution system requirements, and monitoring and reporting requirements established in the 4MP for small municipal providers, which will become effective on January 1, 2019. **PLEASE CAREFULLY REVIEW THIS NOTICE AND THE ENCLOSED REQUIREMENTS.**

On July 27, 2016, the Director issued a Final Order adopting the 4MP. The 4MP was adopted in accordance with Arizona's Groundwater Code (Code), which requires the Director to establish a continuing mandatory conservation program for all persons withdrawing, distributing or using groundwater within the AMA. For small municipal providers, the Code requires the Director to establish reasonable conservation requirements. The Code also requires the Director to establish conservation measures as may be appropriate for individual users and economically reasonable conservation requirements for the distribution of groundwater by cities, towns, private water companies and irrigation districts within their service areas.

As required by the Code, the 4MP contains reasonable conservation requirements for small municipal providers (4MP, section 5-708). The 4MP also contains individual user conservation requirements for municipal providers and individual users (4MP, section 5-709), conservation requirements for municipal distribution systems (4MP, section 5-710), monitoring and reporting requirements for municipal providers and individual users (4MP, section 5-711), and remediated groundwater accounting for conservation requirements (4MP, section 5-712). The aforementioned sections are enclosed herein as Attachment B1 which is incorporated into this notice by reference.

As a municipal provider serving 250 acre-feet or less of water for non-irrigation use during a calendar year, you are a small municipal provider. Beginning on January 1, 2019, and continuing

until the first compliance date for any substitute requirements in the Fifth Management Plan, you shall comply with the conservation requirements for small municipal providers in section 5-708 of the 4MP, the individual user requirements in section 5-709 of the 4MP, the distribution system conservation requirements for small municipal providers in section 5-710 of the 4MP and the applicable monitoring and reporting requirements in section 5-711 of the 4MP.

You should be aware that if you begin serving more than 250 acre-feet of water per year for non-irrigation use during the fourth management period, you will become a large municipal provider. In that event, you will be required to comply with the conservation requirements for new large municipal providers in section 5-707 of the 4MP and the distribution system requirements for large municipal providers pursuant to section 5-710(1) of the 4MP.

You have the right to seek administrative relief from the conservation requirements established in the 4MP. You also have the right to seek judicial review of the Director's Order adopting the 4MP. The following is a description of your rights.

Administrative Relief

The Director has found the conservation requirements in the 4MP to be equitable for most water users. However, there are two separate methods for seeking administrative relief from the conservation requirements if you believe you will be unable to comply with the requirements. You may request a VARIANCE or an ADMINISTRATIVE REVIEW.

1. VARIANCE

A person who requires additional time to comply with a new conservation requirement or distribution system requirement may apply to the director for a VARIANCE from the requirement pursuant to A.R.S. § 45-574. The director may grant a variance for up to five years upon a showing of "compelling economic circumstances" that will prevent the person from complying with the requirement. An application for a variance must be filed within 90 days after the date you receive this notice.

2. ADMINISTRATIVE REVIEW

If you feel that a conservation requirement or distribution system requirement is unreasonable as applied to you, you may apply for an ADMINISTRATIVE REVIEW of the requirement pursuant to A.R.S. § 45-575. An application for administrative review under A.R.S. § 45-575 must be filed within 90 days after the date you receive this notice.

An administrative review may also be applied for at any time during the fourth management period if extraordinary circumstances not in existence as of the date of this notice make it unreasonable to require your compliance with a conservation requirement. If these circumstances should arise during the fourth management period, please contact Chanel Fitch-Kirkpatrick at 602-771-8585 for information and application procedures.

Judicial Review

In addition to seeking administrative relief through a request for variance or administrative review, you may seek judicial review of the Director's Order adopting the 4MP pursuant to A.R.S. § 45-114(C). Any action for judicial review must be filed within 35 days after your receipt of this notice.

You may review the entire 4MP at the locations listed in Attachment E, enclosed herein. If you have any questions regarding your conservation requirements or if you need an application form and information on the Variance or Administrative Review procedures, please call Chanel Fitch-Kirkpatrick at 602-771-8585.

Sincerely,

Clint Chandler
Assistant Director, Water Planning & Permitting Division

ARIZONA DEPARTMENT OF WATER RESOURCES

2009 SERVICE AREA MAP UPDATE

Provider Name: PARK PLACE APARTMENTS

Provider Number: 56-000324.0000

RECEIVED FEB 17 2010 ARIZONA DEPT. OF WATER RESOURCES TUCSON AMA

According to A.R.S. § 45-498 of the Arizona Groundwater Code, each city, town, private water company and irrigation district within an Active Management Area is required to maintain an accurate and current map delineating its service area and water distribution system.

If your service area boundaries or operating distribution system have not changed since January 1, 2009 please indicate this below. If your service area boundaries or operating distribution system have changed since January 1, 2009, please indicate this below and submit two copies of your revised service area map to the Tucson AMA office no later than March 31, 2010. You may submit the maps along with your 2009 Annual Water Withdrawal and Use Report if you wish. A duplicate copy of the service area map submitted to the Department shall be kept on file at your offices.

Maps must be drawn at a scale of 1:31,680 (2 inches to the mile) or larger and must contain all of the elements listed below:

1. The principal features of the operating distribution system including wells, water treatment plants, pumping stations, reservoirs and storage tanks, canals and existing water mains of a diameter greater than or equal to four (4) inches.
2. The diameter and linear miles of the mains and the capacity of other features of the operating distribution system.
3. The changes to your operating distribution system made between January 1, 2009 and December 31, 2009 highlighted in a "contrasting" color.
4. Changes to the service area boundary since January 1, 2009 must be shown as accurately as possible in a "contrasting" color. "Service area" denotes the area of land actually being served water.
5. Townships, ranges and sections must be included within the exterior boundaries of the service area.
6. A map legend, scale bar, north arrow, and date.
7. Each map must be signed and dated by an authorized representative.

✓ Service area boundaries and operating distribution system have not changed since January 1, 2009.

__ Service area boundaries or operating distribution system have changed since January 1, 2009.
(Two copies of the revised map must be submitted with your annual report)

Dear Provider:

Pursuant to Arizona Revised Statutes (A.R.S.) § 45-498 of the Groundwater Code, each city, town, private water company, and irrigation district within an AMA must maintain a current map delineating its service area and distribution system with the Arizona Department of Water Resources. On the reverse side of this letter is a form to indicate whether your service area boundaries or distribution system have changed since January 1, 2009.

Please submit the completed form, along with map copies if applicable, to the Tucson AMA office by March 31, 2010. If you have any questions, please contact the Tucson AMA office at 520-770-3800.

Sincerely,

Jeff Tannler

ARIZONA DEPARTMENT OF WATER RESOURCES

2009 SERVICE AREA MAP UPDATE

Provider Name: PARK PLACE APARTMENTS

Provider Number: 56-000324.0000

According to A.R.S. § 45-498 of the Arizona Groundwater Code, each city, town, private water company and irrigation district within an Active Management Area is required to maintain an accurate and current map delineating its service area and water distribution system.

If your service area boundaries or operating distribution system have not changed since January 1, 2009 please indicate this below. If your service area boundaries or operating distribution system have changed since January 1, 2009, please indicate this below and submit two copies of your revised service area map to the Tucson AMA office no later than March 31, 2010. You may submit the maps along with your 2009 Annual Water Withdrawal and Use Report if you wish. A duplicate copy of the service area map submitted to the Department shall be kept on file at your offices.

Maps must be drawn at a scale of 1:31,680 (2 inches to the mile) or larger and must contain all of the elements listed below:

1. The principal features of the operating distribution system including wells, water treatment plants, pumping stations, reservoirs and storage tanks, canals and existing water mains of a diameter greater than or equal to four (4) inches.

2. The diameter and linear miles of the mains and the capacity of other features of the operating distribution system.

3. The changes to your operating distribution system made between January 1, 2009 and December 31, 2009 highlighted in a "contrasting" color.

4. Changes to the service area boundary since January 1, 2009 must be shown as accurately as possible in a "contrasting" color. "Service area" denotes the area of land actually being served water.

5. Townships, ranges and sections must be included within the exterior boundaries of the service area.

6. A map legend, scale bar, north arrow, and date.

7. Each map must be signed and dated by an authorized representative.

___ Service area boundaries and operating distribution system have not changed since January 1, 2009.

___ Service area boundaries or operating distribution system have changed since January 1, 2009. (Two copies of the revised map must be submitted with your annual report)

Dear Tucson AMA Municipal Provider:

This is an OFFICIAL NOTICE of modifications to your conservation requirements for the Third Management Period, 2000 – 2010. It is important that you review and understand this notice.

I. Modification of the Third Management Plan

The Director of Water Resources ("Director") has adopted modifications to the conservation requirements established for municipal water providers in the management plan for the Tucson Active Management Area for the Third Management Period ("Third Management Plan"). The modifications were made pursuant to the public hearing and comment provisions of A.R.S. § 45-572. The purpose of this notice is to inform you of the modifications.

The modifications to the conservation requirements for municipal providers fall into two broad categories. First, the non-per capita conservation program for large municipal providers was modified to allow for increased flexibility in the use of substitute reasonable conservation measures and to make corrections and technical changes. Second, the individual user requirements for municipal providers and individual users were modified to conform to recent legislation regarding responsibility for compliance with the requirements and to change the provisions allowing waivers from the right-of-way landscaping regulations.

II. Summary of Modifications

The following is a brief description of the modifications to the conservation requirements for large municipal providers, grouped according to the three categories described in the preceding section. References are to the paragraphs in the enclosed attachments where the official language of the modification is found.

A. Non-Per Capita Conservation Program

1. The "Landscape Retrofit Program For Existing Residential Customers" reasonable conservation measure (RCM) was removed from the Residential Interior category of the Substitute Reasonable Conservation Measure list and

added to the Residential Exterior category of the Substitute Reasonable Conservation Measure list.

2. The "Distribution Of Conservation Information To All New Non-Residential Customers And Submittal Of Water Use Plan By New Large Facilities" RCM has been modified by removing references to new large produce processing facilities as an individual user.

3. The "Exterior Audit Program For Existing Non-Residential Customers" RCM has been modified by labeling it as a Non-Residential Exterior RCM, and not a Non-Residential Interior RCM.

4. The "Water Audit And Fixture Retrofit Program For Existing Residential Customers" RCM has been modified to clarify that only those audits or retrofits that are verified by the water provider as having been successfully completed will count towards the required number of audits or retrofits. Additional language has been added to require a follow up survey of a statistically significant sample of audited customers to determine if they have implemented any changes in interior water use habits. The "Audit Program For Existing Residential Customers" RCM was similarly modified to clarify that only those audits that are verified as having been successfully completed will count towards the number of audits required by the RCM.

5. The "Landscape Ordinance Or Condition Of New Service for New Facilities" RCM has been modified to exclude all schools, parks, cemeteries, common areas of housing developments and public recreational facilities from the provisions of this RCM.

6. Section 5-104 of the Third Management Plan was modified to allow a provider regulated under the program to replace a standard RCM in a water use category with a substitute RCM in a different water use category if the director determines that the substitute RCM will result in a water use efficiency that is greater than the efficiency that would result from implementation of the standard RCM and that the substitution will not result in the provider implementing no RCMs in the water use category in which the standard RCM is contained. Previously, the program only allowed for the substitution of a standard RCM with a substitute RCM in the same water use category or a system related substitute RCM.

B. Individual User Requirements

1. Section 5-111 of the Third Management Plan have was modified to conform with Laws 2002, Ch. 133, § 2, which amended A.R.S. § 45-571.02 and allows the Director of Water Resources to give notice of an individual user requirement to an existing individual user more than thirty days after the management plan was adopted. If a notice is given more than thirty days following the adoption of the management plan, the individual user shall comply with the requirement by January 1 of the calendar year following the first full year after the date of the notice, and the municipal water provider shall continue to be responsible for

complying with the requirement until the first date on which the individual user is required to comply with the requirement.

2. Section 5-111 of the Third Management Plan was modified to clarify that acceptable reasons for granting a waiver for the purpose of serving groundwater to plants in publicly-owned right-of ways that are not listed on the Low Water Use /Drought Tolerant Plant List are for cases involving low-light conditions and elevation which lead to the inability to grow low water use plants. The previous provision allowing for the possibility of a waiver concerning service to water features in publicly-owned right of ways was removed.

III. Effective Date of Modified Conservation Requirements

The modifications described in Section II became effective on May 19, 2003.

The official language of the modifications to the individual user requirements is set forth in the enclosed documents. The official language of the modifications to the Non-Per Capita Conservation Program may be reviewed at the Department's website, www.water.az.gov.

If you have any questions regarding this notice please call the Tucson AMA office at (520) 770-3800.

Sincerely,

s/*Herbert R Guenther*

ARIZONA DEPARTMENT OF WATER RESOURCES
2002 ANNUAL WATER USE REPORT
SCHEDULE F-1
SMALL WATER PROVIDER

RIGHT NUMBER: 56-000324.0000
PROVIDER NAME: CAMDEN VIEW
CONTACT PERSON: Karen Hartwell
PHONE NUMBER: 520-625-1671

Pursuant to Section 5-113 of the Third Management Plan (TMP) for the Tucson Active Management Area, small municipal water providers (those that supply 250 acre-feet/year or less) are required to supply the following information. **Please contact the Tucson AMA at 770-3800 if assistance is needed.**

PART 1 - DELIVERIES TO USE GROUPS there are no delivery meters

Please indicate the total quantity of water delivered *(both metered and unmetered)* to each of the following user groups for calendar year 2002.

a. Residential - include all uses of water related to service of residences *(housing units)* including both interior and exterior water use. This should include deliveries to individually metered single family residences, multi-family housing complexes that are on master meters and group quarters (see page two for definition).

Metered 126.20 acre-feet
Unmetered _____ acre-feet Total 126.20 acre-feet

b. Non-residential - include all water delivered for purposes other than residential, including turf-related facilities *(item d below)*. **Do not include effluent or deliveries to irrigation rights or other service area rights.**

Metered _____ acre-feet
Unmetered _____ acre-feet Total _____ acre-feet

c. Total deliveries *(add amounts in a and b above)* _____ acre-feet

d. Turf-related facilities - include all *non-effluent* water delivered to facilities with ten or more acres of turf. These deliveries should be included in non-residential use *(item b above)*. Please note that a Schedule G-2 must also be submitted for each turf-related facility receiving water from your system in 2002.

_____ acre-feet

e. Total effluent deliveries *(not included in GPCD or lost water calculations)* _____ acre-feet

Unmetered deliveries must be calculated using a generally accepted method of estimating water use. Explain below how any unmetered deliveries were calculated:

_____
_____
_____
_____

2002 Schedule F-1, Page 2
Right #: 56-000324.0000
Provider Name: CAMDEN VIEW

PART 2 - LOST AND UNACCOUNTED FOR WATER

Lost and unaccounted for water is calculated by subtracting total deliveries from total water used. Effluent and deliveries to irrigation rights or other service areas are not included in the calculation.

a) Total quantity of water used *(from Part V of the Annual Report Summary Page):* 126.20 acre-feet

b) Total metered and unmetered (estimated) deliveries *(Part 1c above):* 126.20 acre-feet

c) Lost and unaccounted for water *(subtract Part 2b from 2a above):* 0 acre-feet

d) Percent of lost and unaccounted for water:

_____ AF) _____ AF x 100 = _____ Percent
lost and unaccounted for water *(Part 2c)* — total used *(Part 2a)*

PART 3 - HOUSING UNITS SERVED

A housing unit means a group of rooms or a single room occupied as separate living quarters. Housing unit includes a single family home, a patio home, a townhouse, a condominium, an apartment, a permanently setup mobile home or a unit in a multifamily complex. Housing unit does not include a mobile home in an overnight or limited stay mobile home park or a unit in a campground, motel, hotel, or other temporary lodging facility.

a) A Single family housing unit means a detached dwelling, including permanently setup mobile homes not in mobile home parks.

Indicate net change in single family housing units *(not service connections)* in your service area between July 1, 2000 and July 1, 2002:

0 units

b) A Multifamily housing unit means a mobile home in a mobile home park and any permanent housing unit having one or more common walls with another housing unit located in a multifamily residential structure, and includes a unit in a duplex, triplex, fourplex, condominium development, townhome development or apartment complex.

Indicate net change in multifamily housing units *(not service connections)* in your service area between July 1, 2000 and July 1, 2002:

0 units

c) Group quarters means living quarters occupied by one or more people under care or custody, such as orphanages, nursing homes and prisons, or quarters such as college dormitories, fraternity or sorority houses, nurses dormitories, rooming houses, hotels with permanent residents and congregate housing for the elderly.

Indicate net change in group quarters in your service area between July 1, 2001 and July 1, 2002:

0 units

ARIZONA DEPARTMENT OF WATER RESOURCES

JANE DEE HULL
Governor

JOSEPH C. SMITH
Director

January 20, 2002

Dear Provider:

Enclosed are your Annual Water Withdrawal and Use Report forms for calendar year 2001. The summary page is printed on the reverse side of this letter. This report is for service area right holders who have withdrawn groundwater from their own wells, who may have received water from others or may have delivered water to other right holders. The Department has preprinted certain information from our records onto these forms. Pay particular attention to the schedules and worksheets. If any of the preprinted information is incorrect, please make the necessary changes. Note that a separate annual report form must be filed for each right you own. Separate checks should be enclosed to cover the fees associated with each right and the right number should be written on the check.

The Groundwater Code requires that each person who owns a right to withdraw groundwater in an Active Management Area must file an annual report, even if no groundwater was used. Persons who did not withdraw or use water during 2001 are required to return the form with zeros in the appropriate blanks and sign and date the summary page.

Reports must be received by the Department or postmarked no later than March 31, 2002. The penalty for filing late is $25.00 per month or part of a month that the report is late up to $150.00. In addition, if you withdrew groundwater, and did not pay the withdrawal fee on time, the penalty is 10% of the unpaid fee per month or part of a month that the fees are delinquent, up to a maximum of 60% of the unpaid balance.

If your water right has been sold, then both the buyer and seller must notify the Department of the conveyance. The owner of the right as of December 31, 2001 is responsible for filing an annual report covering the entire calendar year. Please contact your AMA office for conveyance forms and instructions.

We have tried to provide you with the proper forms according to information in our files. Failure to receive the proper forms does not relieve a person of the responsibility of keeping the required records or filing the required reports. You should keep a copy of this report for your records.

If you need help or have questions, contact your AMA office listed at the top of the Summary Page of the report.

Sincerely,

Jim Holway
Assistant Director
Groundwater Management Division

INSTRUCTIONS - REPORT OF GROUNDWATER WITHDRAWALS

Note: If any information pre-printed on this form is incorrect, please make the needed corrections. For that information not already pre-printed on this form, please follow the directions below.

1. Enter owner name and groundwater right or permit number, if not already shown, in [1].
2. Enter DWR well registration number and location of each well, if not already shown, in [2].
3. Enter power company name, account number and meter number, if not already shown, in [3].
4. Enter device type used to measure withdrawals, if not already shown, in [4] (see list below).
5. If energy meter serves uses other than the well, indicate "Y" in [5]; if energy meter does not serve other uses (meter is dedicated to the well) indicate "N" in [5].
6. Enter energy consumed by well and units of measure from appropriate worksheet in [6].
7. If device types 2 through 6 are used, indicate the average discharge and divider or total hours from the appropriate worksheet in [7] and [8].
8. Enter total acre-feet of groundwater withdrawn for each well, as calculated on attached worksheets, in [9].
9. Enter total acre-feet of exchange groundwater pumped for each well, as calculated on attached worksheets, in [10].
10. If applicable, adjust the total acre-feet of Exchange Groundwater for each well in [11]. This applies to noticed groundwater for groundwater exchanges for which the exchange agreement requires payback within the same year that groundwater is given.
11. Enter grand total acre-feet withdrawn in [12] and in Part I of the Summary Page.

COLUMN [4] DEVICE TYPE LEGEND

1. Pumpage measured by meter or other totalizer/recorder devices (use worksheet W-1)
2. Pipeflow with pumpage calculated using electrical energy records (use worksheet W-2)
3. Pipeflow with pumpage calculated using natural gas energy records (use worksheet W-3)
4. Open channel flow with pumpage calculated using electrical energy records (use worksheet W-4)
5. Open channel flow with pumpage calculated using natural gas energy records (use worksheet W-5)
6. Pumpage calculated using hour meters (use worksheet W-6)

MEASURING DEVICE MALFUNCTION

Pursuant to A.A.C. R12-15-906, a measuring device that fails to perform for more than seventy-two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken within 30 days, and estimates of withdrawals made during the period the device was out of service must be provided. Results of the two per year required flow-rate measurements must also be attached. A Measuring Device Malfunction Report is available on request.

Please contact your local Active Management Area if you need assistance completing this form.

INSTRUCTIONS - REPORT OF WATER RECEIVED FROM OTHER SOURCES

Note: If any information pre-printed on this form is incorrect, please make the needed corrections.
For that information not already preprinted on this form, please follow the directions below.

IRRIGATION GRANDFATHERED RIGHT HOLDERS

Use Part I for all water received from an irrigation district. Spill water will not be charged to your flexibility account. If you have any questions regarding your flexibility account, contact DWR for more information.

MUNICIPAL PROVIDERS

Use Part I for the water received from an irrigation district, including CAP water from an irrigation district. Use Part III for CAP water received from CAWCD or from another municipal provider. Spill water and effluent will not be used to determine compliance with your GPCD target.

TYPE 1 RIGHTS

Do not report sources other than groundwater. If you receive groundwater from a source other than an irrigation the amount of water received from each well must be reported. Other sources of water need to be reported on a supplemental schedule.

TYPE 2 RIGHTS AND GROUNDWATER WITHDRAWAL PERMITS

Do not report sources other than groundwater. The amount of groundwater received from each well must be reported. Any well used must be reported. Any well used must be listed on your Type 2 certificate or groundwater withdrawal permit. Other sources of water need to be reported on a supplemental schedule.

ARIZONA DEPARTMENT OF WATER RESOURCES

PUMPAGE MEASURED BY METER OR OTHER TOTALIZER RECORDER DEVICES

INSTRUCTIONS

Note: If any information pre-printed on this form is incorrect, please make the needed corrections. For that information not already preprinted on this form, please follow the directions below.

1. Enter DWR well registration number & location in [1].
2. If the meter has been changed during the reporting year, enter type, make, model & size of measuring device used to measure discharge in [2]. If the device is permanent, enter date installed or last overhauled.
3. Enter power company name, account number, meter number if incorrect and total energy consumption in [3]. Indicate units as KWH, therms or other measurement.
4. Indicate whether the electrical meter serves uses other than the well "Y" or "N" on column [4].
5. Enter initial totalizer reading as of January 1, 2001 in [5]. If your meter reads in 10's, 100's, or 1000's of units, be sure to add the correct number of zeroes.
6. Enter ending reading as of December 31, 2001 in [6]. If the totalizer dial has rolled over during the year, enter the number 1 in front of the reading, if twice, a 2, etc.
7. Subtract reading in [5] from reading in [6] and enter the difference in [7].
8. Convert the total amount pumped to acre feet by using the appropriate conversion; enter the results in [8].
   - If meter reads in gallons, divide [7] by 325,851
   - If meter reads in cubic feet, divide [7] by 43,560
   - If meter reads in acre-feet, no conversion is necessary
9. If your meter malfunctioned during the year, enter the estimate of withdrawals in acre-feet made during the out-of-service period in [9] and attach the results of the two per year required flow rate measurements.
10. Add [8] and [9] and enter result in [10].

ENTER THE FOLLOWING ON SCHEDULE A OR PART 1 OF SCHEDULE A-GSF

WORKSHEET W-1		SCHEDULE A
Box [1]	---	DWR well registry number & location in column [2]. If not already shown.

ARIZONA DEPARTMENT OF WATER RESOURCES
2001 ANNUAL WATER USE REPORT
SCHEDULE F-1
SMALL WATER PROVIDER

RIGHT NUMBER: 56-000324.0000
PROVIDER NAME: ORACLE VILLA APTS
CONTACT PERSON: Karen Hartwell
PHONE NUMBER: 520 625-1671

Pursuant to Section 5-113 of the Second Management Plan (SMP) for the Tucson Active Management Area, small municipal water providers (those that supply 250 acre-feet/year or less) are required to supply the following information. **Please contact the Tucson AMA at 770-3800 if assistance is needed.**

PART 1 - DELIVERIES TO USE GROUPS There are no delievery meters

Please indicate the total quantity of water delivered *(both metered and unmetered)* to each of the following user groups for calendar year 2001.

a. Residential - include all uses of water related to service of residences *(housing units)* including both interior and exterior water use. This should include deliveries to multi-family housing complexes that are on master meters and deliveries to individually metered single family residences.

Metered _____ acre-feet
Unmetered _____ acre-feet Total _____ acre-feet

b. Non-residential - include all water delivered for purposes other than residential, including turf-related facilities *(item d below)*. **Do not include effluent or deliveries to irrigation rights or other service area rights.**

Metered _____ acre-feet
Unmetered _____ acre-feet Total _____ acre-feet

c. Total deliveries *(add amounts in a and b above)* _____ acre-feet

d. Turf-related facilities - include all *non-effluent* water delivered to facilities with ten or more acres of turf. These deliveries should be included in non-residential use *(item b above)*. Please note that a Schedule G-2 must also be submitted for each turf-related facility receiving water from your system in 2001.

_____ acre-feet

e. Total effluent deliveries *(not included in GPCD or lost water calculations)* _____ acre-feet

Unmetered deliveries must be calculated using a generally accepted method of estimating water use. Explain below how any unmetered deliveries were calculated:

_____
_____
_____
_____

2001 Schedule F-1, Page 2
Right #: 56-000324.0000
Provider Name: ORACLE VILLA APTS

PART 2 - LOST AND UNACCOUNTED FOR WATER

Lost and unaccounted for water is calculated by subtracting total deliveries from total water used. Effluent and deliveries to irrigation rights or other service areas are not included in the calculation.

a) Total quantity of water used *(from Part V of the Annual Report Summary Page):* 130.81 acre-feet

b) Total metered and unmetered (estimated) deliveries *(Part 1c above):* 130.81 acre-feet

c) Lost and unaccounted for water *(subtract Part 2b from 2a above):* _____ acre-feet

d) Percent of lost and unaccounted for water:

_____ AF) _____ AF x 100 = 0 Percent
lost and unaccounted for water *(Part 2c)* — total used *(Part 2a)*

PART 3 - HOUSING UNITS SERVED

A housing unit means a group of rooms or a single room occupied as separate living quarters. Housing unit includes a single family home, a patio home, a townhouse, a condominium, an apartment, a permanently setup mobile home or a unit in a multifamily complex. Housing unit does not include a mobile home in an overnight or limited stay mobile home park or a unit in a campground, motel, hotel, or other temporary lodging facility.

a) A Single family housing unit means a detached dwelling, including permanently setup mobile homes not in mobile home parks.

Indicate net change in single family housing units *(not service connections)* in your service area between July 1, 2000 and July 1, 2001: 0 units

b) A Multifamily housing unit means a mobile home in a mobile home park and any permanent housing unit having one or more common walls with another housing unit located in a multifamily residential structure, and includes a unit in a duplex, triplex, fourplex, condominium development, townhome development or apartment complex.

Indicate net change in multifamily housing units *(not service connections)* in your service area between July 1, 2000 and July 1, 2001: 0 units

ARIZONA DEPARTMENT OF WATER RESOURCES

JANE DEE HULL
Governor

RITA PEARSON MAGUIRE
Director

January 20, 2001

Dear Provider:

Enclosed are your Annual Water Withdrawal and Use Report forms for calendar year 2000. The summary page is printed on the reverse side of this letter. This report is for service area right holders who have withdrawn groundwater from their own wells, who may have received water from others or may have delivered water to other right holders. The Department has preprinted certain information from our records onto these forms. Pay particular attention to the schedules and worksheets. If any of the preprinted information is incorrect, please make the necessary changes. Note that a separate annual report form must be filed for each right you own. Separate checks should be enclosed to cover the fees associated with each right and the right number should be written on the check.

The Groundwater Code requires that each person who owns a right to withdraw groundwater in an Active Management Area must file an annual report, even if no groundwater was used. Persons who did not withdraw or use water during 2000 are required to return the form with zeros in the appropriate blanks and sign and date the summary page.

Reports must be received by the Department or postmarked no later than March 31, 2001. The penalty for filing late is $25.00 per month or part of a month that the report is late up to $150.00. In addition, if you withdrew groundwater, and did not pay the withdrawal fee on time, the penalty is 10% of the unpaid fee per month or part of a month that the fees are delinquent, up to a maximum of 60% of the unpaid balance.

If your water right has been sold, then both the buyer and seller must notify the Department of the conveyance. The owner of the right as of December 31, 2000 is responsible for filing an annual report covering the entire calendar year. Please contact your AMA office for conveyance forms and instructions.

We have tried to provide you with the proper forms according to information in our files. Failure to receive the proper forms does not relieve a person of the responsibility of keeping the required records or filing the required reports. You should keep a copy of this report for your records.

If you need help or have questions, contact your AMA office listed at the top of the Summary Page of the report.

Sincerely,

Jim Holway

Jim Holway
Assistant Director
Groundwater Management Division

INSTRUCTIONS - REPORT OF GROUNDWATER WITHDRAWALS

Note: If any information pre-printed on this form is incorrect, please make the needed corrections. For that information not already preprinted on this form, please follow the directions below.

1. Enter owner name and groundwater right or permit number, if not already shown, in [1].
2. Enter DWR well registration number and location of each well, if not already shown, in [2].
3. Enter power company name, account number and meter number, if not already shown, in [3].
4. Enter device type used to measure withdrawals, if not already shown, in [4] (see list below).
5. If energy meter serves uses other than the well, indicate "Y" in [5]; if energy meter does not serve other uses (meter is dedicated to the well) indicate "N" in [5].
6. Enter energy consumed by well and units of measure from appropriate worksheet in [6].
7. If device types 2 through 6 are used, indicate the average discharge and divider or total hours from the appropriate worksheet in [7] and [8].
8. Enter total acre-feet of groundwater withdrawn for each well, as calculated on attached worksheets, in [9].
9. Enter total acre-feet of exchange groundwater pumped for each well, as calculated on attached worksheets, in [10].
10. If applicable, adjust the total acre-feet of Exchange Groundwater for each well in [11]. This applies to noticed groundwater for groundwater exchanges for which the exchange agreement requires payback within the same year that groundwater is given.
11. Enter grand total acre-feet withdrawn in [12] and in Part I of the Summary Page.

COLUMN [4] DEVICE TYPE LEGEND

1. Pumpage measured by meter or other totalizer/recorder devices (use worksheet W-1)
2. Pipeflow with pumpage calculated using electrical energy records (use worksheet W-2)
3. Pipeflow with pumpage calculated using natural gas energy records (use worksheet W-3)
4. Open channel flow with pumpage calculated using electrical energy records (use worksheet W-4)
5. Open channel flow with pumpage calculated using natural gas energy records (use worksheet W-5)
6. Pumpage calculated using hour meters (use worksheet W-6)

MEASURING DEVICE MALFUNCTION

Pursuant to A.A.C. R12-15-906, a measuring device that fails to perform for more than seventy-two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken within 30 days, and estimates of withdrawals made during the period the device was out of service must be provided. Results of the two per year required flow-rate measurements must also be attached. A Measuring Device Malfunction Report is available on request.

Please contact your local Active Management Area if you need assistance completing this form.

INSTRUCTIONS - REPORT OF WATER RECEIVED FROM OTHER SOURCES

Note: If any information pre-printed on this form is incorrect, please make the needed corrections.
For that information not already preprinted on this form, please follow the directions below.

Irrigation Grandfathered Right Holders

Use Part I for all water received from an irrigation district. Spill water will not be charged to your flexibility account. If you have any questions regarding your flexibility account, contact DWR for more information.

Municipal Providers

Use Part I for the water received from an irrigation district, including CAP water from an irrigation district. Use Part III for CAP water received from CAWCD or from another municipal provider. Spill water and effluent will not be used to determine compliance with your GPCD target.

Type 1 Rights

Do not report sources other than groundwater. If you receive groundwater from a source other than an irrigation the amount of water received from each well must be reported. Other sources of water need to be reported on a supplemental schedule.

Type 2 Rights and Groundwater Withdrawal Permits

Do not report sources other than groundwater. The amount of groundwater received from each well must be reported. Any well used must be reported. Any well used must be listed on your Type 2 certificate or groundwater withdrawal permit. Other sources of water need to be reported on a supplemental schedule.

Please contact your local Active Management Area if you need assistance completing this form.

INSTRUCTIONS

Note: If any information pre-printed on this form is incorrect, please make the needed corrections. For that information not already preprinted on this form, please follow the directions below.

1. Enter DWR well registration number & location in [1].
2. If the meter has been changed during the reporting year, enter type, make, model & size of measuring device used to measure discharge in [2]. If the device is permanent, enter date installed or last overhauled.
3. Enter power company name, account number, meter number if incorrect and total energy consumption in [3]. Indicate units as KWH, therms or other measurement.
4. Indicate whether the electrical meter serves uses other than the well "Y" or "N" on column [4].
5. Enter initial totalizer reading as of January 1, 2000 in [5]. If your meter reads in 10's, 100's, or 1000's of units, be sure to add the correct number of zeroes.
6. Enter ending reading as of December 31, 2000 in [6]. If the totalizer dial has rolled over during the year, enter the number 1 in front of the reading, if twice, a 2, etc.
7. Subtract reading in [5] from reading in [6] and enter the difference in [7].
8. Convert the total amount pumped to acre feet by using the appropriate conversion; enter the results in [8].
   - If meter reads in gallons, divide [7] by 325,851
   - If meter reads in cubic feet, divide [7] by 43,560
   - If meter reads in acre-feet, no conversion is necessary
9. If your meter malfunctioned during the year, enter the estimate of withdrawals in acre-feet made during the out-of-service period in [9] and attach the results of the two per year required flow rate measurements.
10. Add [8] and [9] and enter result in [10].

ENTER THE FOLLOWING ON SCHEDULE A OR PART 1 OF SCHEDULE A-GSF

WORKSHEET W-1		SCHEDULE A
Box [1]	---	DWR well registry number & location in column [2]. If not already shown.
Box [3]	---	Power company name, account number and meter number in column [3]. and total energy consumption in column [6].
Box [4]	---	Meter serves other uses "Y" or "N" in column [5].
Box [10]	---	Groundwater withdrawn in column [9].

January 20, 2000

Dear Provider:

Enclosed are your Annual Water Withdrawal and Use Report forms for calendar year 1999. The summary page is printed on the reverse side of this letter. This report is for service area right holders who have withdrawn groundwater from their own wells, who may have received water from others or may have delivered water to other right holders. The Department has preprinted certain information from our records onto these forms. Pay particular attention to the schedules and worksheets. If any of the preprinted information is incorrect, please make the necessary changes. Note that a separate annual report form must be filed for each right you own. Separate checks should be enclosed to cover the fees associated with each right and the right number should be written on the check.

The Groundwater Code requires that each person who owns a right to withdraw groundwater in an **Active Management Area** must file an annual report, even if no groundwater was used. Persons who did not withdraw or use water during 1999 are required to return the form with zeros in the appropriate blanks and sign and date the summary page.

Reports must be received by the Department or postmarked no later than March 31, 2000. The penalty for filing late is $25.00 per month or part of month that the report is late up to $150.00. In addition, if you withdrew groundwater, and did not pay the withdrawal fee on time, the penalty is 10% of the unpaid fee per month or part of a month that the fees are delinquent, up to a maximum of 60% of the unpaid balance.

If your water right has been sold, then both the buyer and seller are responsible for notifying the Department of the conveyance.**The owner of the right as of December 31, 1999 is responsible for filing an annual report covering the entire calendar year.** Please contact your AMA office for conveyance forms and instructions.

We have tried to provide you with the proper forms according to information in our files. Failure to receive the proper forms does not relieve a person of the responsibility of keeping the required records or filing the required reports. You should keep a copy of this report for your records.

If you need help or have questions, contact your AMA office listed at the top of the Summary page of the report.

Sincerely,

Jim Holway

INSTRUCTIONS

If any information pre-printed on this form is incorrect, please make the needed corrections. For that information not already preprinted on this form, please follow the directions below.

Enter owner name and groundwater right number, if not already shown, in [1]

Enter DWR well registration number and location of each well, if not already shown, in [2]

Enter power company name, account number and meter number, if not already shown, in [3]

Enter device type used to measure withdrawals, if not already shown, in [4] (see list below)

If energy meter serves uses other than the well, indicate "Y" in [5] ; if energy meter does not serve other uses (meter is dedicated to the well) indicate "N" in [5]

Enter energy consumed by well and units of measure from appropriate worksheet in [6]

If device types 2 through 6 are used, indicate the average discharge and divider or total hours from the appropriate worksheet in [7] and [8]

Enter total acre-feet of groundwater withdrawn for each well, as calculated on attached worksheets, in [9]

Enter total acre-feet of exchange groundwater pumped for each well, as calculated on attached worksheets, in [10]

If applicable, adjust the total acre-feet of Exchange Groundwater for each well in [11]. This applies to noticed groundwater for groundwater exchanges for which the exchange agreement requires payback within the same calendar year that groundwater is given.

Enter grand total acre-feet withdrawn in [12] and in Part I of the Summary Page.

DEVICE TYPE

1. Pumpage measured by meter or other totalizer/recorder devices (use worksheet W-1)
2. Pipeflow with pumpage calculated using electrical energy records (use worksheet W-2)
3. Pipeflow with pumpage calculated using natural gas energy records (use worksheet W-3)
4. Open channel flow with pumpage calculated using electrical energy records (use worksheet W-4)
5. Open channel flow with pumpage calculated using natural gas energy records (use worksheet W-5)
6. Pumpage calculated using hour meters (use worksheet W-6)

MEASURING DEVICE MALFUNCTION

Pursuant to A.A.C. R12-15-906, a measuring device that fails to perform for more than seventy-two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken within 30 days, and estimates of withdrawals made during the period the device was out of service must be provided. Results of the two per year required flow-rate measurements must also be attached. A measuring Device Malfunction Report is available on request.

NOTE: A WORKSHEET MUST BE ATTACHED FOR EACH WELL FROM WHICH WATER WAS WITHDRAWN.

INSTRUCTIONS

If any information pre-printed on this form is incorrect, please make the needed corrections. For that information not already pre-printed on this form, please follow the directions below.

Irrigation Grandfathered Right Holders - Use Part I for all water received from an irrigation district. Spill water will not be charged to your flexibility account. If you have any questions regarding your flexibility account, contact DWR for more information.

Municipal Providers - Use Part I for the water received from an irrigation district, including CAP water from an irrigation district. Use Part III for CAP water received from CAWCD or from another municipal provider. Spill water and effluent will not be used to determine compliance with your GPCD target.

Type 1 Rights - Do not report sources other than groundwater. If you receive groundwater from a source other than an irrigation district, the amount of water received from each well must be reported. Other sources of water need to be reported on a supplemental schedule.

Type 2 Rights and Groundwater Withdrawal Permits - Do not report sources other than groundwater. The amount of groundwater received from each well must be reported. Any well used must be reported. Any well used must be listed on your Type 2 certificate or groundwater withdrawal permit. Other sources of water need to be reported on a supplemental schedule.

SMALL WATER PROVIDER

RIGHT NUMBER: 56-000324.0000
PROVIDER NAME: ORACLE VILLA APTS
CONTACT PERSON: Karen Hartwell
PHONE NUMBER: 520-625-1671

Pursuant to Section 5-113 of the Second Management Plan (SMP) for the Tucson Active Management Area, small municipal water providers (those that supply 250 acre-feet/year or less) are required to supply the following information. **Please contact the Tucson AMA at 770-3800 if assistance is needed.**

RECEIVED
FEB 29 2000
RECORDS MGT

PART 1 - DELIVERIES TO USE GROUPS

Please indicate the total quantity of water delivered *(both metered and unmetered)* to each of the following user groups for 1999.

a. Residential - include all uses of water related to service of residences *(housing units)* including both interior and exterior water use. This should include deliveries to multi-family housing complexes that are on master meters and deliveries to individually metered single family residences.

Metered 144.36 acre-feet
Unmetered 0 acre-feet
Total 144.36 acre-feet

b. Non-residential - include all water delivered for purposes other than residential, including turf-related facilities *(item d below)*. **Do not include effluent or deliveries to irrigation rights or other service area rights.**

Metered 0 acre-feet
Unmetered 0 acre-feet
Total 0 acre-feet

c. Total deliveries *(add amounts in a and b above)* 144.36 acre-feet

d. Turf-related facilities - include all *non-effluent* water delivered to facilities with ten or more acres of turf. These deliveries should be included in non-residential use *(item b above)*. Please note that a Schedule G-2 must also be submitted for each turf-related facility receiving water from your system in 1998.

0 acre-feet

e. Total effluent deliveries *(not included in GPCD or lost water calculations)* 0 acre-feet

Unmetered deliveries must be calculated using a generally accepted method of estimating water use. Explain below how any unmetered deliveries were calculated:

1999 Schedule F-1, Page 2
Right #: 56-000324.0000
Provider Name: ORACLE VILLA APTS

PART 2 - LOST AND UNACCOUNTED FOR WATER

Lost and unaccounted for water is calculated by subtracting total deliveries from total water used. Effluent and deliveries to irrigation rights or other service areas are not included in the calculation.

a) Total quantity of water used *(from Part V of the Annual Report Summary Page)*: 144.36 acre-feet

b) Total metered and unmetered (estimated) deliveries *(Part 1c above)*: 144.36 acre-feet

c) Lost and unaccounted for water *(subtract Part 2b from 2a above)*: 0 acre-feet

d) Percent of lost and unaccounted for water:

_____ AF ÷ _____ AF x 100 = 0 Percent
lost and unaccounted for water *(Part 2c)* — total used *(Part 2a)*

RECEIVED
FEB 29 2000
RECORDS MGT

PART 3 - HOUSING UNITS SERVED

A housing unit means a group of rooms or a single room occupied as separate living quarters. Housing unit includes a single family home, a patio home, a townhouse, a condominium, an apartment, a permanently setup mobile home or a unit in a multifamily complex. Housing unit does not include a mobile home in an overnight or limited stay mobile home park or a unit in a campground, motel, hotel, or other temporary lodging facility.

a) "Single family housing unit" means a detached dwelling, including permanently setup mobile homes not in mobile home parks.

Indicate net change in single family housing units *(not service connections)* in your service area between July 1, 1998 and July 1, 1999:

0 units

b) "Multifamily housing unit" means a mobile home in a mobile home park and any permanent housing unit having one or more common walls with another housing unit located in a multifamily residential structure, and includes a unit in a duplex, triplex, fourplex, condominium development, townhome development or apartment complex.

Indicate net change in multifamily housing units *(not service connections)* in your service area between July 1, 1998 and July 1, 1999:

0 units

ARIZONA DEPARTMENT OF WATER RESOURCES

1999 SERVICE AREA MAP UPDATE

Provider Name: ORACLE VILLAGE

Provider Number: 56-000324.0000

According to A.R.S. 45-498 of the Arizona Groundwater Management Act, each city, town, private water company and irrigation district within an Active Management Area is required to maintain an accurate and current map delineating its service area and water distribution system.

If your service area boundaries or operating distribution system have not changed since January 1, 1999, indicate this below. If your service area boundaries or operating distribution system have changed since January 1, 1999, indicate this below and submit two copies of your revised service area map with your 1999 Annual Water withdrawal and Use Report no later than March 31, 2000. A duplicate copy of the service area map submitted to the Department shall be kept on file at your office.

Maps must be drawn to a scale of 1:31680 (2 inches to the mile) or larger and must contain all of the elements listed below:

1. The principal features of the operating distribution system including wells, water treatment plants, pumping stations, reservoirs and storage tanks, canals and water mains of a diameter greater than or equal to four (4) inches.

2. The diameter and linear miles of the mains and the capacity of other features of the operating distribution system.

3. The location and names of major streets which carry traffic through and around the service area.

4. Notations of the legal description of the area covered by the service area map. Such notations should include on the borders of the map the township(s) and range(s) covered by the map. Within the body of the map indicate the section(s) covered by the map.

5. Each map must be dated and signed by an authorized representative.

X Service area boundaries and operating distribution system have not changed since January 1, 1999.

____ Service area boundaries or operating distribution system have changed since January 1, 1999. (Two copies of the revised map must be submitted with your annual report.)

HOUSTON, TX 77027

Dear Small Municipal Provider:

This is an OFFICIAL NOTICE that the director of the Arizona Department of Water Resources (director) has issued a final order adopting the management plan for the Tucson Active Management Area (AMA) for the third management period, 2000 to 2010 (TMP). This is also an Official Notice of the conservation requirements, distribution system requirements and monitoring and reporting requirements established in the TMP for small municipal providers, which will become effective on January 1, 2002. **PLEASE CAREFULLY REVIEW THIS NOTICE AND THE ENCLOSED REQUIREMENTS.**

On December 13, 1999, the director issued a final order adopting the TMP. The TMP was adopted in accordance with Arizona's Groundwater Code, which requires the director to establish a continuing mandatory conservation program for all persons withdrawing, distributing or using groundwater within the AMA. For small municipal providers, the Groundwater Code requires the director to establish reasonable conservation requirements. The Code also requires the director to establish conservation measures as may be appropriate for individual users and economically reasonable conservation requirements for the distribution of groundwater by cities, towns, private water companies, and irrigation districts within their service areas.

As required by the Groundwater Code, the TMP contains reasonable conservation requirements for small municipal providers (TMP, section 5-110). The TMP also contains individual user conservation requirements for municipal providers (TMP, section 5-111), distribution system conservation requirements for municipal providers (TMP, section 5-112) and monitoring and reporting requirements for municipal providers (TMP, section 5-113).

As a municipal provider serving 250 acre-feet or less of water for non-irrigation use during a calendar year, you are a small municipal provider. Beginning on January 1, 2002, and continuing until the first compliance date for any substitute requirements in the Fourth Management Plan, you shall comply with the conservation requirements for small municipal providers in section 5-110 of the TMP, the individual user requirements in section 5-111 of the TMP, the distribution system conservation requirements for small municipal providers in section 5-112(2) of the TMP and the applicable monitoring and reporting requirements in section 5-113 of the TMP.

You should be aware that if you begin serving more than 250 acre-feet of water per year for non-irrigation use during the third management period, you will become a large municipal provider. In that event, you will be required to comply with the conservation requirements for new large municipal providers and the distribution system requirements for large municipal providers in the TMP beginning with the second full calendar year after you are given written notice of those requirements by the director.

Attachment A sets forth the conservation requirements and monitoring and reporting requirements established in the TMP for small and large municipal providers. Attachment A is incorporated into this notice by reference.

You have the right to seek administrative relief from the conservation requirements established in the TMP. You also have the right to seek judicial review of the director's order adopting the TMP. The following is a description of your rights.

Administrative Relief

The director has found the conservation requirements in the TMP to be equitable for most water users. However, there are two separate methods for seeking administrative relief from the conservation requirements if you believe you will be unable to comply with the requirements. You may request a VARIANCE or an ADMINISTRATIVE REVIEW.

1. VARIANCE

   A person who requires additional time to comply with a conservation requirement or distribution system requirement may apply to the director for a VARIANCE from the requirement pursuant to A.R.S. § 45-574. The director may grant a variance for up to five years upon a showing of "compelling economic circumstances." An application for a variance must be filed within 90 days after the date you receive this notice.

2. ADMINISTRATIVE REVIEW

   If you feel that a conservation requirement or distribution system requirement is unreasonable as applied to you, you may apply for an ADMINISTRATIVE REVIEW of the requirement pursuant to A.R.S. § 45-575(A). An application for administrative review under A.R.S. § 45-575(A) must be filed within 90 days after the date you receive this notice.

   An administrative review may also be applied for at any time during the third management period if extraordinary circumstances not in existence as of the date of this notice make it unreasonable to require your compliance with a conservation requirement. If these circumstances should arise during the third management period, please contact the Tucson AMA for information and application procedures.

Judicial Review

In addition to seeking administrative relief through a request for variance or administrative review, you may seek judicial review of the director's order adopting the TMP pursuant to A.R.S. § 45-114(C). Any action for judicial review must be filed within thirty-five days after your receipt of this notice. You may review the entire TMP at the locations listed in Attachment B.

If you have any questions regarding your conservation requirements or if you need an application form and information on the Variance or Administrative Review procedures, please call the Tucson AMA at (520) 770-3800.

Sincerely,

Rita P. Pearson

3) Calculate Late Payment Fee _____ (10 % X number of months late X withdrawal fee calculated in Part I above) $ 0

PART VII TOTAL FEES DUE

Add amounts from Parts I and VI $ 365.43

Mail or hand deliver this report, together with the appropriate schedules, worksheets and fees to the Arizona Department of Water Resources. If mailed, the report must be postmarked no later than March 31, 1999. If hand delivered, the report must be received by the Department's Records Management Unit or local AMA office no later than 5:00 PM on March 31, 1999.

THIS REPORT MUST BE FILED EVEN IF NO WATER WAS USED PURSUANT TO THIS RIGHT.

REPORTS FILED AFTER MARCH 31, 1999 ARE SUBJECT TO LATE FEES (ARS § 45-632) AND PAYMENT OF PREVIOUSLY WAIVED MONETARY PENALTIES ASSOCIATED WITH PRIOR GROUNDWATER CODE VIOLATIONS.

I hereby certify, under penalty of perjury, that the information contained in this report is, to the best of my knowledge and belief, true, correct and complete.

ARIZONA DEPARTMENT OF WATER RESOURCES

JANE DEE HULL
Governor

RITA P. PEARSON
Director

January 20, 1999

Dear Provider:

Enclosed are your Annual Water Withdrawal and Use Report forms for calendar year 1998. The summary page is printed on the reverse side of this letter. This report is for service area right holders who have withdrawn groundwater from their own wells, who may have received water from others or may have delivered water to other right holders. The Department has preprinted certain information from our records onto these forms. Please pay particular attention to the schedules and worksheets. If any of the preprinted information is incorrect, please make the necessary changes. Please note that a separate annual report form must be filed for each right you own. Separate checks should be enclosed to cover the fees associated with each right and the right number should be written on the check.

The Groundwater Code requires that each person who owns a right to withdraw groundwater in an **Active Management Area** must file an annual report, even if no groundwater was used. Persons who did not withdraw or use water during 1998 are required to return the form with zeros in the appropriate blanks.

Reports must be received by the Department or postmarked no later than March 31, 1999. The penalty for filing late is $25.00 per month or part of month that the report is late up to $150.00. In addition, if you withdrew groundwater, and did not pay the fee on time or did not pay the proper fee the penalty is 10% of the unpaid fee per month or part of a month that the fees are delinquent, up to a maximum of 60% of the unpaid balance.

If your water right has been sold, then both the buyer and seller are responsible for notifying the Department of the conveyance. **The owner of the right as of December 31, 1998 is responsible for filing an annual report covering the entire calendar year.** Please contact your AMA office for conveyance forms and instructions.

We have tried to provide you with the proper forms according to information in our files. The law does specify, however, that failure to receive the proper forms does not relieve a person of the responsibility of keeping the required records or filing the required reports. You may want to keep a copy of this report for your records.

If you need help or have questions, contact your AMA office listed at the top of the Summary page of the report.

Sincerely,

Jim Holway

Jim Holway

Assistant Director
Groundwater Management Division

WORKSHEET W-1

ARIZONA DEPT. OF WATER RESOURCES

PUMPAGE MEASURED BY METER OR OTHER TOTALIZER RECORDER DEVICES

INSTRUCTIONS

1. Enter DWR Well Registration No. & Location in [1].
2. If the meter has been changed during the reporting year, enter type, make, model & size of measuring device used to measure discharge in [2]. If the device is permanent, enter date installed or last overhauled.
3. Enter power company name, account number, meter number and total energy consumption in [3]. Indicate units as KWH, therms or other measurement.
4. Indicate whether the energy meter serves other uses in [4].
5. Enter initial totalizer reading as of January 1, in [5]. If your meter reads in 10's, 100's, or 1000's of units, be sure to add the correct number of zeroes.
6. Enter ending reading as of December 31, in [6]. If the totalizer dial has rolled over during the year, enter the number 1 in front of the reading, if twice, a 2, etc.
7. Subtract reading in [5] from reading in [6] and enter the difference in [7].
8. Convert the Total Amount Pumped to acre feet by using the appropriate conversion; enter the results in [8].
   - --- If meter reads in gallons, divide [7] by 325,851
   - --- If meter reads in cubic feet, divide [7] by 43,560
   - --- If meter reads in acre-feet, no conversion is necessary
9. If your meter malfunctioned during the year, enter the estimate of withdrawals in acre-feet made during the out-of-service period in [9] and attach the results of the two per year required flow rate measurements.
10. Add [8] and [9] and enter result in [10].

ENTER THE FOLLOWING ON SCHEDULE A OR PART 1 OF SCHEDULE A-GSF

WORKSHEET		SCHEDULE A
Item 1	---	DWR Well Reg No. & Location in Col [2]. If not already shown.

INSTRUCTIONS

If any information pre-printed on this form is incorrect, please make the needed corrections. For that information not already preprinted on this form, please follow the directions below.

Enter owner name and groundwater right number, if not already shown, in [1]

Enter DWR well registration number and location of each well, if not already shown, in [2]

Enter power company name, account number and meter number, if not already shown, in [3]

Enter device type used to measure withdrawals, if not already shown, in [4] (see list below)

If energy meter serves uses other than the well, indicate "Y" in [5] ; if energy meter does not serve other uses (meter is dedicated to the well) indicate "N" in [5]

Enter energy consumed by well and units of measure from appropriate worksheet in [6]

If device types 2 through 6 are used, indicate the average discharge and divider or total hours from the appropriate worksheet in [7] and [8]

Enter total acre-feet of groundwater withdrawn for each well, as calculated on attached worksheets, in [9]

Enter total acre-feet of exchange groundwater pumped for each well, as calculated on attached worksheets, in [10]

If applicable, adjust the total acre-feet of Exchange Groundwater for each well in [11]. This applies to noticed groundwater for groundwater exchanges for which the exchange agreement requires payback within the same calendar year that groundwater is given.

Enter grand total acre-feet withdrawn in [12] and in Part I of the Summary Page.

DEVICE TYPE

1. Pumpage measured by meter or other totalizer/recorder devices(use worksheet W-1)
2. Pipeflow with pumpage calculated using electrical energy records(use worksheet W-2)
3. Pipeflow with pumpage calculated using natural gas energy records(use worksheet W-3)
4. Open channel flow with pumpage calculated using electrical energy records(use worksheet W-4)
5. Open channel flow with pumpage calculated using natural gas energy records(use worksheet W-5)
6. Pumpage calculated using hour meters (use worksheet W-6)

MEASURING DEVICE MALFUNCTION

Pursuant to A.A.C. R12-15-906, a measuring device that fails to perform for more than seventy-two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken within 30 days, and estimates of withdrawals made during the period the device was out of service must be provided. Results of the two per year required flow-rate measurements must also be attached. A measuring Device Malfunction Report is available on request.

NOTE: A WORKSHEET MUST BE ATTACHED FOR EACH WELL FROM WHICH WATER WAS WITHDRAWN.

ARIZONA DEPT. OF WATER RESOURCES

INSTRUCTIONS

If any information pre-printed on this form is incorrect, please make the needed corrections. For that information not already pre-printed on this form, please follow the directions below.

Irrigation Grandfathered Right Holders - Use Part I for all water received from an irrigation district. Spill water will not be charged to your flexibility account. If you have any questions regarding your flexibility account, contact DWR for more information.

Municipal Providers - Use Part I for the water received from an irrigation district, including CAP water from an irrigation district. Use Part III for CAP water received from CAWCD or from another municipal provider. Spill water and effluent will not be used to determine compliance with your GPCD target.

Type 1 Rights - Do not report sources other than groundwater. If you receive groundwater from a source other than an irrigation district, the amount of water received from each well must be reported. Other sources of water need to be reported on a supplemental schedule.

Type 2 Rights and Groundwater Withdrawal Permits - Do not report sources other than groundwater. The amount of groundwater received from each well must be reported. Any well used must be reported. Any well used must be listed on your Type 2 certificate or groundwater withdrawal permit. Other sources of water need to be reported on a supplemental schedule.

ARIZONA DEPARTMENT OF WATER RESOURCES

RECEIVED MAR 15 1999 RECORDS MGT

1998 SERVICE AREA MAP UPDATE

Provider Name: Oracle Villa

Provider Number: 56-020324.0000

According to A.R.S. 45-498 of the Arizona Groundwater Management Act, each city, town, private water company and irrigation district within an Active Management Area is required to maintain an accurate and current map delineating its service area and water distribution system.

If your service area boundaries or operating distribution system have not changed since January 1, 1998, indicate this below. If your service area boundaries or operating distribution system have changed since January 1, 1998, indicate this below and submit two copies of your revised service area map with your 1998 Annual Water withdrawal and Use Report no later than March 31, 1999. A duplicate copy of the service area map submitted to the Department shall be kept on file at your office.

Maps must be drawn to a scale of 1:31680 (2 inches to the mile) or larger and must contain all of the elements listed below:

1. The principal features of the operating distribution system including wells, water treatment plants, pumping stations, reservoirs and storage tanks, canals and water mains of a diameter greater than or equal to four (4) inches.

2. The diameter and linear miles of the mains and the capacity of other features of the operating distribution system.

3. The location and names of major streets which carry traffic through and around the service area.

4. Notations of the legal description of the area covered by the service area map. Such notations should include on the borders of the map the township(s) and range(s) covered by the map. Within the body of the map indicate the section(s) covered by the map.

5. Each map must be dated and signed by an authorized representative.

✓ Service area boundaries and operating distribution system have not changed since January 1, 1998.

____ Service area boundaries or operating distribution system have changed since January 1, 1998. (Two copies of the revised map must be submitted with your annual report.)

SCHEDULE F-1
SMALL WATER PROVIDER

RECEIVED
MAR 15 1999
RECORDS MGT

RIGHT NUMBER: 56-000 324.0000
PROVIDER NAME: Oracle Villa
CONTACT PERSON: Karen Hartwell
PHONE NUMBER: 625-1671

Pursuant to Section 5-113 of the Second Management Plan (SMP) for the Tucson Active Management Area, small municipal water providers (those that supply 250 acre-feet/year or less) are required to supply the following information. **Please contact the Tucson AMA at 770-3800 if assistance is needed.**

PART 1 - DELIVERIES TO USE GROUPS

Please indicate the total quantity of water delivered *(both metered and unmetered)* to each of the following user groups for 1998.

a. Residential - include all uses of water related to service of residences *(housing units)* including both interior and exterior water use. This should include deliveries to multi-family housing complexes through master meters.

Metered 163.6 acre-feet
Unmetered _____ acre-feet
Total 163.6 acre-feet

b. Non-residential - include all water delivered for purposes other than residential, including turf-related facilities *(item d below)*. **Do not include effluent or deliveries to irrigation rights or other service area rights.**

Metered 0 acre-feet
Unmetered 0 acre-feet
Total 0 acre-feet

c. Total deliveries *(add amounts in a and b above)* 163.6 acre-feet

d. Turf-related facilities - include all *non-effluent* water delivered to facilities with ten or more acres of turf. These deliveries should be included in non-residential use *(item b above)*. Please note that a Schedule G-2 must also be submitted for each turf-related facility receiving water from your system in 1998.

0 acre-feet

e. Total effluent deliveries *(not included in GPCD or lost water calculations)* 0 acre-feet

Unmetered deliveries must be calculated using a generally accepted method of estimating water use. Explain below how any unmetered deliveries were calculated:

1998 Schedule F-1, Page 2
Right #56-000 324.00020
Provider Name: Oracle Villa

RECEIVED
MAR 15 1999
RECORDS MGT

PART 2 - LOST AND UNACCOUNTED FOR WATER

Lost and unaccounted for water is calculated by subtracting total deliveries from total water used. Effluent and deliveries to irrigation rights or other service areas are not included in the calculation.

a) Total quantity of water used *(from Part V of the Annual Report Provider Summary):* 163.6 acre-feet

b) Total metered and unmetered deliveries *(Part 1c above):* 163.6 acre-feet

c) Lost and unaccounted for water *(subtract Part 2b from 2a above):* 0 acre-feet

d) Percent of lost and unaccounted for water:

— AF ÷ — AF x 100 = — Percent
lost and unaccounted for water *(Part 2c)* — total used *(Part 2a)*

PART 3 - HOUSING UNITS SERVED

A housing unit means a group of rooms or a single room occupied as separate living quarters. Housing unit includes a single family home, a patio home, a townhouse, a condominium, an apartment, a permanently setup mobile home or a unit in a multifamily complex. Housing unit does not include a mobile home in an overnight or limited stay mobile home park or a unit in a campground, motel, hotel, or other temporary lodging facility.

a) "Single family housing unit" means a detached dwelling, including permanently setup mobile homes not in mobile home parks.

Indicate net change in single family housing units *(not service connections)* in your service area between July 1, 1997 and July 1, 1998:

— units

b) "Multifamily housing unit" means a mobile home in a mobile home park and any permanent housing unit having one or more common walls with another housing unit located in a multifamily residential structure, and includes a unit in a duplex, triplex, fourplex, condominium development, townhome development or apartment complex.

Indicate net change in multifamily housing units *(not service connections)* in your service area between July 1, 1997 and July 1, 1998:

0 units

ARIZONA DEPARTMENT OF WATER RESOURCES

Jane Dee Hull
Governor

Rita P. Pearson
Director

January 20, 1998

Dear Provider:

Enclosed are your Annual Water Withdrawal and Use Report forms for calendar year 1997. These forms are printed on the reverse side of this letter. This report is for service area right holders who have withdrawn groundwater from their own wells, who may have received water from others or may have delivered water to other right holders. The Department has preprinted certain information from our records onto these forms. Please pay particular attention to the schedules and worksheets. If any of the preprinted information is incorrect, please make the necessary changes. Please note that a separate annual report must be filed for each right you own. Separate checks should be enclosed to cover the fees associated with each right and the right number should be written on the check.

The Groundwater Code requires that each person who owns a right to withdraw groundwater in an **Active Management Area** must file an annual report, even if no groundwater was used. Persons who did not withdraw or use water during 1997 are required to return the forms with zeros in the appropriate blanks.

Reports must be received by the Department or postmarked no later than March 31, 1998. The penalty for filing late is $25.00 per month or part of month that the report is late up to $150.00. In addition, if you withdrew groundwater, and did not pay the fee on time or did not pay the proper fee the penalty is 10% of the unpaid fee per month or part of a month that the fees are delinquent, up to a maximum of 60% of the unpaid balance.

If your water right has been sold, then both the buyer and seller are responsible for notifying the Department of the conveyance. **The owner of the right as of December 31, 1997 is responsible for filing an annual report covering the entire calendar year.** Please contact your AMA office for conveyance forms and instructions.

We have tried to provide you with the proper forms according to information in our files. The law does specify, however, that failure to receive the proper forms does not relieve a person of the responsibility of keeping the required records or filing the required reports. You may want to keep a copy of this report for your records.

If you need help or have questions, contact your AMA office listed at the top of the Summary page of the report.

INSTRUCTIONS

If any information pre-printed on this form is incorrect, please make the needed corrections. For that information not already preprinted on this form, please follow the directions below.

Enter owner name and groundwater right number, if not already shown, in [1]

Enter DWR well registration number and location of each well, if not already shown, in [2]

Enter power company name, account number and meter number, if not already shown, in [3]

Enter device type used to measure withdrawals, if not already shown, in [4] (see list below)

If energy meter serves uses other than the well, indicate "Y" in [5] ; if energy meter does not serve other uses (meter is dedicated to the well) indicate "N" in [5]

Enter energy consumed by well and units of measure from appropriate worksheet in [6]

If device types 2 through 6 are used, indicate the average discharge and divider or total hours from the appropriate worksheet in [7] and [8]

Enter total acre-feet of groundwater withdrawn for each well, as calculated on attached worksheets, in [9]

Enter grand total acre-feet withdrawn in [10] and in Part I of the Summary Page.

DEVICE TYPE

1. Pumpage measured by meter or other totalizer/recorder devices(use worksheet W-1)
2. Pipeflow with pumpage calculated using electrical energy records(use worksheet W-2)
3. Pipeflow with pumpage calculated using natural gas energy records(use worksheet W-3)
4. Open channel flow with pumpage calculated using electrical energy records(use worksheet W-4)
5. Open channel flow with pumpagecalculated using natural gas energy records(use worksheet W-5)
6. Pumpage calculated using hour meters (use worksheet W-6)

MEASURING DEVICE MALFUNCTION

Pursuant to A.A.C. R12-15-906,a measuring device that fails to perform for more than seventy two (72)hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken within 30 days, and estimates of withdrawals made during the period the device was out of service must be provided. A measuring Device Malfunction Report is available on request.

NOTE: A WORKSHEET MUST BE ATTACHED FOR EACH WELL FROM WHICH WATER WAS WITHDRAWN.

ARIZONA DEPT. OF WATER RESOURCES

INSTRUCTIONS

If any information pre-printed on this form is incorrect, please make the needed corrections. For that information not already pre-printed on this form, please follow the directions below.

Irrigation Grandfathered Right Holders - Use Part I for all water received from an irrigation district. Spill water will not be charged to your flexibility account. If you have any questions regarding Your flexibility account, contact DWR for more information.

Municipal Providers - Use Part I for the water received from an irrigation district, including CAP water from an irrigation district. Use Part III for CAP water received from CAWCD or from another municipal provider. Spill water and effluent will not be used to determine compliance with your GPCD target.

Type 1 Rights - Do not report sources other than groundwater. If you receive groundwater from a source other than an irrigation district, the amount of water received from each well must be reported. Other sources of water need to be reported on a supplemental schedule.

Type 2 Rights and Groundwater Withdrawal Permits - Do not report sources other than groundwater. The amount of groundwater received from each well must be reported. Any well used must be reported. Any well used must be listed on your Type 2 certificate or groundwater withdrawal permit. Other sources of water need to be reported on a supplemental schedule.

WORKSHEET W-1

ARIZONA DEPT. OF WATER RESOURCES

PUMPAGE MEASURED BY METER OR OTHER TOTALIZER RECORDER DEVICES

INSTRUCTIONS

1. Enter DWR Well Registration No. & Location in [1].
2. If the meter has been changed during the reporting year, enter type, make, model & size of measuring device used to measure discharge in [2]. If the device is permanent, enter date installed or last overhauled.
3. Enter power company name, account number, meter number and total energy consumption in [3]. Indicate units as KWH, therms or other measurement.
4. Indicate whether the energy meter serves other uses in [4].
5. Enter initial totalizer reading as of January 1, in [5]. If your meter reads in 10's, 100's, or 1000's of units, be sure to add the correct number of zeroes.
6. Enter ending reading as of December 31, in [6]. If the totalizer dial has rolled over during the year, enter the number 1 in front of the reading, if twice, a 2, etc.
7. Subtract reading in [5] from reading in [6] and enter the difference in [7].
8. Convert the Total Amount Pumped to acre feet by using the appropriate conversion; enter the results in [8].
   - --- If meter reads in gallons, divide [7] by 325,851
   - --- If meter reads in cubic feet, divide [7] by 43,560
   - --- If meter reads in acre feet, no conversion is necessary
9. If your meter malfunctioned during the year, enter the estimate of withdrawals in acre feet made during the out-of-service period in [9] and attach the results of the two required flow rate measurements.
10. Add [8] and [9] and enter result in [10].

ENTER THE FOLLOWING ON SCHEDULE A OR PART 1 OF SCHEDULE A-GSF

WORKSHEET		SCHEDULE A
Item 1	---	DWR Well Reg No. & Location in Col [2]. If not already shown.

Item 4	---	Meter Serves other uses "Y" or "N" in Col [5].
Item 10	---	Groundwater withdrawn in Col [9].

THIS WORKSHEET MUST BE SUBMITTED WITH SCHEDULE A OR A-GSF.

ARIZONA DEPARTMENT OF WATER RESOURCES
1997 ANNUAL WATER USE REPORT
SCHEDULE F-1
SMALL WATER PROVIDER

RECEIVED
MAR 13 1998
RECORDS MGT

RIGHT NUMBER: 56-000 324.0000
PROVIDER NAME: Oracle Villa Apartments
CONTACT PERSON: Donna Crawford
PHONE NUMBER: 520-297-6141

Pursuant to Section 5-113 of the Second Management Plan (SMP) for the Tucson Active Management Area, small municipal water providers (those that supply 250 acre-feet/year or less) are required to supply the following information. **Please contact the Tucson AMA at 770-3800 if assistance is needed.**

PART 1 - DELIVERIES TO USE GROUPS

Please indicate the total quantity of water delivered *(both metered and unmetered)* to each of the following user groups for 1997.

a. Residential - include all uses of water related to service of residences *(housing units)* including both interior and exterior water use. This should include deliveries to multi-family housing complexes through master meters.

Metered ✓ acre-feet
Unmetered _____ acre-feet Total 81.38 acre-feet

b. Non-residential - include all water delivered for purposes other than residential, including turf-related facilities *(item d below)*. **Do not include effluent or deliveries to irrigation rights or other service area rights.**

Metered _____ acre-feet
Unmetered _____ acre-feet Total _____ acre-feet

c. Total deliveries *(add amounts in a and b above)* _____ acre-feet

d. Turf-related facilities - include all *non-effluent* water delivered to facilities with ten or more acres of turf. These deliveries should be included in non-residential use *(item b above)*. Please note that a Schedule G-2 must also be submitted for each turf-related facility receiving water from your system in 1997.

_____ acre-feet

e. Total effluent deliveries *(not included in GPCD or lost water calculations)* _____ acre-feet

Unmetered deliveries must be calculated using a generally accepted method of estimating water use. Explain below how any unmetered deliveries were calculated:

_____
_____
_____
_____

(OVER)

1997 Schedule F-1, Page 2
Right #56-000_____
Provider Name: Oracle Villa

PART 2 - LOST AND UNACCOUNTED FOR WATER

Lost and unaccounted for water is calculated by subtracting total deliveries from total water used. Effluent and deliveries to irrigation rights or other service areas are not included in the calculation.

a) Total quantity of water used *(from Part V of the Annual Report Provider Summary):* _____ acre-feet

b) Total metered and unmetered deliveries *(Part 1c above):* _____ acre-feet

c) Lost and unaccounted for water *(subtract Part 2b from 2a above):* _____ acre-feet

d) Percent of lost and unaccounted for water:

_____ AF ÷ _____ AF x 100 = _____ Percent
lost and unaccounted for water *(Part 2c)* — total used *(Part 2a)*

PART 3 - HOUSING UNITS SERVED

A housing unit means a group of rooms or a single room occupied as separate living quarters. Housing unit includes a single family home, a patio home, a townhouse, a condominium, an apartment, a permanently setup mobile home or a unit in a multifamily complex. Housing unit does not include a mobile home in an overnight or limited stay mobile home park or a unit in a campground, motel, hotel, or other temporary lodging facility.

a) "Single family housing unit" means a detached dwelling, including permanently setup mobile homes not in mobile home parks.

Indicate net change in single family housing units *(not service connections)* in your service area between July 1, 1996 and July 1, 1997:

_____ units

b) "Multifamily housing unit" means a mobile home in a mobile home park and any permanent housing unit having one or more common walls with another housing unit located in a multifamily residential structure, and includes a unit in a duplex, triplex, fourplex, condominium development, townhome development or apartment complex.

Indicate net change in multifamily housing units *(not service connections)* in your service area between July 1, 1996 and July 1, 1997:

0 units

ARIZONA DEPARTMENT OF WATER RESOURCES

1997 SERVICE AREA MAP UPDATE

RECEIVED
MAR 13 1998
RECORDS MGT

Provider Name: Oracle Villa

Provider Number: (520) 297-6141

According to A.R.S. 45-498 of the Arizona Groundwater Management Act, each city, town, private water company and irrigation district within an Active Management Area is required to maintain an accurate and current map delineating its service area and water distribution system.

If your service area boundaries or operating distribution system have not changed since January 1, 1997, indicate this below. If your service area boundaries or operating distribution system have changed since January 1, 1997, indicate this below and submit two copies of your revised service area map with your 1997 Annual Water withdrawal and Use Report no later than March 31, 1997. A duplicate copy of the service area map submitted to the Department shall be kept on file at your office.

Maps must be drawn to a scale of 1:31680 (2 inches to the mile) or larger and must contain all of the elements listed below:

1. The principal features of the operating distribution system including wells, water treatment plants, pumping stations, reservoirs and storage tanks, canals and water mains of a diameter greater than or equal to four (4) inches.

2. The diameter and linear miles of the mains and the capacity of other features of the operating distribution system.

3. The location and names of major streets which carry traffic through and around the service area.

4. Notations of the legal description of the area covered by the service area map. Such notations should include on the borders of the map the township(s) and range(s) covered by the map. Within the body of the map indicate the section(s) covered by the map.

5. Each map must be dated and signed by an authorized representative.

✓ Service area boundaries and operating distribution system have not changed since January 1, 1997.

____ Service area boundaries or operating distribution system have changed since January 1, 1997. (Two copies of the revised map must be submitted with your annual report.)

ARIZONA DEPARTMENT OF WATER RESOURCES

FIFE SYMINGTON
Governor

RITA P. PEARSON
Director

January 15, 1996

Dear Provider:

Enclosed are your Annual Water Withdrawal and Use Report forms for calendar year 1995. These forms are printed on the reverse side of this letter. This report is for service area right holders who withdraw groundwater from their own wells, who may receive water from others, and who may deliver water to other right holders or individual users. The Department has preprinted certain information from our records onto these forms. Please pay particular attention to schedules and worksheets. If any of the preprinted information is incorrect, please make the necessary changes. Please note that a separate annual report must be filed for each right you own or lease. Separate checks should be enclosed to cover the fees associated with each right and the right number should be written on the check.

The Groundwater Code requires that each person who owns a right to withdraw groundwater in an **Active Management Area** must file an annual report, even if no groundwater was used. Persons who did not withdraw water during 1995 are required to return the forms with zeros in the appropriate blanks.

Since the deadline of March 31 occurs on a Sunday this year, reports received by the Department or postmarked no later than April 1, 1996 will be considered timely. The penalty for filing late is $25.00 per month or part of a month that the report is late up to $150.00. In addition, if you withdrew groundwater, and did not pay the fee on time or did not pay the proper fee, the penalty is 10% of the unpaid fee per month or part of a month that the fees are delinquent, up to a maximum of 60% of the unpaid balance.

If your water right has been sold, both the buyer and seller are responsible for notifying the Department of the conveyance. **The owner of the right as of December 31, 1995 is responsible for filing an annual report covering the entire calendar year.** Please contact your AMA office for conveyance forms and instructions.

We have tried to provide you with the proper forms according to information in our files. The law does specify, however, that failure to receive the proper forms does not relieve a person of the responsibility of keeping the required records or filing the required reports. You may want to copy this report for your records.

If you need help or have questions, contact your AMA office listed on the Summary page of your report.

Sincerely,

Herb Dishlip

If any information pre-printed on this form is incorrect, please make the needed corrections. For that information not already pre-printed on this form, please follow the directions below.

Irrigation Grandfathered Right Holders - Use Part I for all water received from an irrigation district. Spill water will not be charged to your flexibility account. If you have any questions regarding your flexibility account, contact DWR for more information.

Municipal Providers - Use Part I for the water received from an irrigation district, including CAP water from an irrigation district. Use Part III for CAP water received from CAWCD or from another municipal provider. Spill water and effluent will not be used to determine compliance with your GPCD target.

Type 1 Rights - Do not report sources other than groundwater. If you receive groundwater from a source other than an irrigation district, the amount of water received from each well must be reported. Other sources of water need to be reported on a supplemental schedule.

Type 2 Rights and Groundwater Withdrawal Permits - Do not report sources other than groundwater. The amount of groundwater received from each well must be reported. Any well used must be reported. Any well used must be listed on your Type 2 certificate or groundwater withdrawal permit. Other sources of water need to be reported on a supplemental schedule.

PUMPAGE MEASURED BY METER OR OTHER TOTALIZER RECORDER DEVICES

INSTRUCTIONS

1. Enter DWR Well Registration No. & Location in [1].

2. If the meter has been changed during the reporting year, enter type, make, model & size of measuring device used to measure discharge in [2]. If the device is permanent, enter date installed or last overhauled.

3. Enter power company name, account number, meter number and total energy consumption in [3]. Indicate units as KWH, therms or other measurement.

4. Indicate whether the energy meter serves other uses in [4].

5. Enter initial totalizer reading as of January 1, in [5]. If your meter reads in 10's, 100's, or 1000's of units, be sure to add the correct number of zeroes.

6. Enter ending reading as of December 31, in [6]. If the totalizer dial has rolled over during the year, enter the number 1 in front of the reading, if twice, a 2, etc.

7. Subtract reading in [5] from reading in [6] and enter the difference in [7].

8. Convert the Total Amount Pumped to acre feet by using the appropriate conversion; enter the result in [8].
   - If meter reads in gallons, divide [7] by 325,851
   - If meter reads in cubic feet, divide [7] by 43,560
   - If meter reads in acre-feet, no conversion is necessary

9. If your meter malfunctioned during the year, enter the estimate of withdrawals in acre-feet made during the out-of-service period in [9].

10. Add [8] and [9] and enter result in [10].

1995 SERVICE AREA MAP UPDATE

Provider Name: Oracle Villa Apts

Provider Number: 56-000-324-000D

According to A.R.S. § 45-498 of the Arizona Groundwater Management Act, each city, town, private water company and irrigation district within an Active Management Area is required to maintain an accurate and current map delineating its service area and water distribution system.

If your service area boundaries or operating distribution system have not changed since January 1, 1995, indicate this below. If your service area boundaries or operating distribution system have changed since January 1, 1995, indicate this below and submit two copies of your revised service area map with your 1995 Annual Water Withdrawal and Use Report no later than March 31, 1996. A duplicate copy of the service area map submitted to the Department shall be kept on file at your offices.

Maps must be drawn at a scale of 1:31,680 (2 inches to the mile) or larger and must contain all of the elements listed below:

1. The principal features of the operating distribution system including wells, water treatment plants, pumping stations, reservoirs and storage tanks, canals and water mains of a diameter greater than or equal to four (4) inches.
2. The diameter and linear miles of the mains and the capacity of other features of the operating distribution system.
3. The location and names of major streets which carry traffic through and around the service area.
4. Notations of the legal description of the area covered by the service area map. Such notations should include on the borders of the map the townships and ranges covered by the map. Within the body of the map indicate the sections covered by the map.
5. Each map must be signed and dated by an authorized representative.

____ Service area boundaries and operating distribution system have not changed since January 1, 1995.

____ Service area boundaries or operating distribution system have changed since January 1, 1995 (Two copies of the revised map must be submitted with your annual report.)

ARIZONA DEPARTMENT OF WATER RESOURCES
1995 ANNUAL WATER USE REPORT
SCHEDULE F-1
SMALL WATER PROVIDER

RIGHT NUMBER: 56-000 324.0000
PROVIDER NAME: Oracle Villa Apartments
CONTACT PERSON: Lisa S. Andreasen
PHONE NUMBER: 520-297-6141

Pursuant to Section 5-113 of the Second Management Plan (SMP) for the Tucson Active Management Area, small municipal water providers (those that supply 250 acre-feet/year or less) are required to supply the following information. **Please contact the Tucson AMA at 628-6758 if assistance is needed.**

PART 1 - DELIVERIES TO USER GROUPS

Please indicate the total quantity of water delivered (both metered and unmetered) to each of the following user groups for 1995.

a. Residential - include all uses of water related to service of residences (housing units) including both interior and exterior water uses. This should include deliveries to multi-family housing developments through master meters.

Metered _____ acre-feet
Unmetered ✓ acre-feet
Total 175.58 acre-feet

b. Non-residential - include all water delivered for purposes other than residential, including turf-related facilities (*item d below*). **Do not include effluent or deliveries to irrigation rights or other service area rights.**

Metered _____ acre-feet
Unmetered _____ acre-feet
Total _____ acre-feet

c. Total deliveries (*add amounts in a and b above*) _____ acre-feet

d. Turf-related facilities - include all water delivered to facilities with ten of more acres of turf. These deliveries should be included in non-residential use (*item b above*). Please note that a Schedule G-2 must be submitted for each turf-related facility receiving water from your system in 1995.

_____ acre-feet

e. Total effluent deliveries (*not included in per-capita or lost water calculations*) _____ acre-feet

Unmetered deliveries must be calculated using a generally accepted method of estimating water use. Explain below how any unmetered deliveries were calculated:

_____

(OVER)

RECEIVED
MAR 11 1996
RECORDS MGT

Right #56-_____
Sm Provider Name_____

PART 2 - LOST AND UNACCOUNTED FOR WATER

Lost and unaccounted for water is calculated by subtracting total deliveries from total water used. Effluent and deliveries to irrigation rights or other service area rights are not included in the calculation.

a) Total quantity of water used (*from Part V of the Annual Report Provider Summary*): _____ acre-feet

b) Total metered and unmetered deliveries (*Part 1c above*): _____ acre-feet

c) Lost and unaccounted for water (*subtract Part 2b from 2a above*): _____ acre-feet

d) Percent of lost and unaccounted for water:

_____AF ÷ _____AF x 100 = _____Percent
lost and unaccounted for water (*Part 2c*) — total used (*Part 2a*)

PART 3 - HOUSING UNITS SERVED

A housing unit means a group of rooms or a single room occupied as separate living quarters. Housing unit includes a single family home, a patio home, a townhouse, a condominium, an apartment, a permanently setup mobile home or a unit in a multifamily complex. Housing unit does not include a mobile home in an overnight or limited-stay mobile home park or a unit in a campground, motel, hotel, or other temporary lodging facility.

a) "Single family housing unit" means a detached dwelling, including permanently setup mobile homes not in mobile home parks.

Indicate net change in single family housing units (not service connections) in your service area between July 1, 1994 and July 1, 1995: _____ units

b) "Multifamily housing unit" means a mobile home in a mobile home park and any permanent housing unit having one or more common walls with another housing unit located in a multifamily residential structure, and includes a unit in a duplex, triplex, fourplex, condominium development, townhome development or apartment complex.

Indicate net change in multifamily housing units (not service connections) in your service area between July 1, 1994 and July 1, 1995: _____ units

FIFE SYMINGTON
Governor

RITA P. PEARSON
Director

January 15, 1995

Dear Groundwater Right Owner:

Enclosed are your Annual Water Withdrawal and Use Report forms for calendar year 1994. These forms are printed on the reverse side of this letter. This report is for service area right holders and irrigation districts who withdraw groundwater from their own wells, who may receive water from others, and who may deliver water to other right holders or individual users. The Department has preprinted certain information from our records onto these forms. Please pay particular attention to schedules and worksheets. If any of the preprinted information is incorrect, please make the necessary changes. Please note that a separate annual report must be filed for each right you own or lease. Separate checks should be enclosed to cover the fees associated with each right and the right number should be written on the check.

The Groundwater Code requires that each person who owns a right to withdraw groundwater in an **Active Management Area** must file an annual report, even if no groundwater was used. Persons who did not withdraw water during 1994 are required to return the forms with zeros in the appropriate blanks.

Reports must be received by the Department or postmarked no later than March 31, 1995. The penalty for filing late is $25.00 per month or part of a month that the report is late up to $150.00. In addition, if you withdrew groundwater, and did not pay the fee on time or did not pay the proper fee, the penalty is 10% of the unpaid fee per month or part of a month that the fees are delinquent, up to a maximum of 60% of the unpaid balance.

If your water right has been sold, both the buyer and seller are responsible for notifying the Department of the conveyance. **The owner of the right as of December 31, 1994 is reponsible for filing an annual report covering the entire calendar year.** Please contact your AMA office for conveyance forms and instructions.

We have tried to provide you with the proper forms according to information in our files. The law does specify, however, that failure to receive the proper forms does not relieve a person of the responsibility of keeping the required records or filing the required reports. You may want to copy this report for your records.

If you need help or have questions, contact your AMA office listed on the Summary page of your report.

Sincerely,

Herb Dishlip

Herb Dishlip

INSTRUCTIONS

If any information pre-printed on this form is incorrect, please make the needed corrections. For that information not already preprinted on this form, please follow the directions below.

Enter owner name and groundwater right number, if not already shown, in [1]

Enter DWR well registration number and location of each well, if not already shown, in [2]

Enter power company name, account number and meter number, if not already shown, in [3]

Enter device type used to measure withdrawals, if not already shown, in [4] (see list below).

If energy meter serves uses other than the well, indicate "Y" in [5]; if energy meter does not serve other uses (meter is dedicated to the well) indicate "N" in [5]

Enter energy consumed by well and units of measure from appropriate worksheet in [6]

If device types 2 through 6 are used, indicate the average discharge and divider or total hours from the appropriate worksheet in [7] and [8]

Enter total acre-feet of groundwater withdrawn for each well, as calculated on attached worksheets, in [9]

Enter grand total acre-feet withdrawn in [10] and in Part I of the Summary Page.

DEVICE TYPE

1. Pumpage measured by meter or other totalizer/recorder devices (use worksheet W-1)
2. Pipeflow with pumpage calculated using electrical energy records (use worksheet W-2)
3. Pipeflow with pumpage calculated using natural gas energy records (use worksheet W-3)
4. Open channel flow with pumpage calculated using electrical energy records (use worksheet W-4)
5. Open channel flow with pumpage calculated using natural gas energy records (use worksheet W-5)
6. Pumpage calculated using hour meters (use worksheet W-6)

MEASURING DEVICE MALFUNCTION

Pursuant to A.C.R.R. R12-15-905, a measuring device that fails to perform for more than seventy two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken within 30 days, and estimates of withdrawals made during the period the device was out of service must be provided. A Measuring Device Malfunction Report is available on request.

NOTE: A WORKSHEET MUST BE ATTACHED FOR EACH WELL FROM WHICH WATER WAS WITHDRAWN.

ARIZONA DEPT. OF WATER RESOURCES

INSTRUCTIONS

If any information pre-printed on this form is incorrect, please make the needed corrections. For that information not already pre-printed on this form, please follow the directions below.

Irrigation Grandfathered Right Holders - Use Part I for all water received from an irrigation district. Spill water will not be charged to your flexibility account. If you have any questions regarding your flexibility account, contact DWR for more information.

Municipal Providers - Use Part I for the water received from an irrigation district, including CAP water from an irrigation district. Use Part III for CAP water received from CAWCD or from another municipal provider. Spill water and effluent will not be used to determine compliance with your GPCD target.

Type 1 Rights - Do not report sources other than groundwater. If you receive groundwater from a source other than an irrigation district, the amount of water received from each well must be reported. Other sources of water need to be reported on a supplemental schedule.

Type 2 Rights and Groundwater Withdrawal Permits - Do not report sources other than groundwater. The amount of groundwater received from each well must be reported. Any well used must be reported. Any well used must be listed on your Type 2 certificate or groundwater withdrawal permit. Other sources of water need to be reported on a supplemental schedule.

ARIZONA DEPARTMENT OF WATER RESOURCES

DEPARTMENT OF WR

1994 SERVICE AREA MAP UPDATE

MAR 2 - 1995

OPERATIONS DIV.

Provider Name: Oracle Villa Apts.

Provider Number: 56-000 324.0000

According to A.R.S. § 45-498 of the Arizona Groundwater Management Act, each city, town, private water company and irrigation district within an Active Management Area is required to maintain an accurate and current map delineating its service area and water distribution system.

If your service area boundaries or operating distribution system have not changed since January 1, 1994, indicate this below. If your service area boundaries or operating distribution system have changed since January 1, 1994, indicate this below and submit two copies of your revised service area map with your 1994 Annual Water Withdrawal and Use Report no later than March 31, 1995. A duplicate copy of the service area map submitted to the Department shall be kept on file at your offices.

Maps must be drawn at a scale of 1:31,680 (2 inches to the mile) or larger and must contain all of the elements listed below:

1. The principal features of the operating distribution system including wells, water treatment plants, pumping stations, reservoirs and storage tanks, canals and water mains of a diameter greater than or equal to four (4) inches.
2. The diameter and linear miles of the mains and the capacity of other features of the operating distribution system.
3. The location and names of major streets which carry traffic through and around the service area.
4. Notations of the legal description of the area covered by the service area map. Such notations should include on the borders of the map the townships and ranges covered by the map. Within the body of the map indicate the sections covered by the map.
5. Each map must be signed and dated by an authorized representative.

✓ Service area boundaries and operating distribution system have not changed since January 1, 1994.

____ Service area boundaries or operating distribution system have changed since January 1, 1994. (Two copies of the revised map must be submitted with your annual report.)

ARIZONA DEPARTMENT OF WATER RESOURCES
1994 ANNUAL WATER USE REPORT
SCHEDULE F-1
SMALL WATER PROVIDER

RIGHT NUMBER: 56-000 - 324, 0000
PROVIDER NAME: Oracle Villa Apts-
CONTACT PERSON: Lisa Andreasen
PHONE NUMBER: 602-297-6141

DEPARTMENT OF WR
MAR 2 - 1995
OPERATIONS DIV.

Pursuant to Section 5-113 of the Second Management Plan (SMP) for the Tucson Active Management Area, small municipal water providers (those that supply 250 acre-feet/year or less) are required to supply the following information. **Please contact the Tucson AMA at 628-6758 if assistance is needed.**

PART 1 - DELIVERIES TO USER GROUPS

Please indicate the total quantity of water delivered (both metered and unmetered) to each of the following user groups for 1994.

a. Residential - include all uses of water related to service of residences (housing units) including both interior and exterior water uses. This should include deliveries to multi-family housing developments through master meters.

Metered _____ acre-feet
Unmetered ✓ acre-feet Total 191.04 acre-feet

b. Non-residential - include all water delivered for purposes other than residential, including turf-related facilities (*item d below*). **Do not include effluent or deliveries to irrigation rights or other service area rights.**

Metered _____ acre-feet
Unmetered _____ acre-feet Total _____ acre-feet

c. Total deliveries (*add amounts in a and b above*) _____ acre-feet

d. Turf-related facilities - include all water delivered to facilities with ten of more acres of turf. These deliveries should be included in non-residential use (*item b above*). Please note that a Schedule G-2 must be submitted for each turf-related facility receiving water from your system in 1994.
_____ acre-feet

e. Total effluent deliveries (*not included in per-capita or lost water calculations*) _____ acre-feet

Unmetered deliveries must be calculated using a generally accepted method of estimating water use. Explain below how any unmetered deliveries were calculated:

_____
_____
_____
_____

(OVER)

1994 Schedule F-1, Page 2
Right #56- 000324.0000
Sm Provider Name Oracle Villa Apts.

PART 2 - LOST AND UNACCOUNTED FOR WATER

Lost and unaccounted for water is calculated by subtracting total deliveries from total water used. Effluent and deliveries to irrigation rights or other service area rights are not included in the calculation.

a) Total quantity of water used (*from Part V of the Annual Report Provider Summary*): _____ acre-feet

b) Total metered and unmetered deliveries (*Part 1c above*): _____ acre-feet

c) Lost and unaccounted for water (*subtract Part 2b from 2a above*): _____ acre-feet

d) Percent of lost and unaccounted for water:

_____AF ÷ _____AF x 100 = _____Percent
lost and unaccounted for water (*Part 2c*) — total used (*Part 2a*)

PART 3 - HOUSING UNITS SERVED

A housing unit means a group of rooms or a single room occupied as separate living quarters. Housing unit includes a single family home, a patio home, a townhouse, a condominium, an apartment, a permanently setup mobile home or a unit in a multifamily complex. Housing unit does not include a mobile home in an overnight or limited-stay mobile home park or a unit in a campground, motel, hotel, or other temporary lodging facility.

a) "Single family housing unit" means a detached dwelling, including permanently setup mobile homes not in mobile home parks.

Indicate net change in single family housing units (not service connections) in your service area between July 1, 1993 and July 1, 1994: _____ units

b) "Multifamily housing unit" means a mobile home in a mobile home park and any permanent housing unit having one or more common walls with another housing unit located in a multifamily residential structure, and includes a unit in a duplex, triplex, fourplex, condominium development, townhome development or apartment complex.

Indicate net change in multifamily housing units (not service connections) in your service area between July 1, 1993 and July 1, 1994: 365 units

MEASURING DEVICE MALFUNCTION

Pursuant to A.C.R.R. R12-15-905, a measuring device that fails to perform for more than seventy two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken as soon as practicable, and estimates of withdrawals made during the period the device was out of service must be provided. A Measuring Device Malfunction Report is available on request.

WATER TOTALIZING METER READINGS		
⑤ INITIAL	⑥ ENDING	⑦ DIFFERENCE
(1)24006100	70,934,800	46,928,700

If meter was replaced during the year, indicate beginning and ending reading for each meter.

8. Convert the Total Amount Pumped to acre feet by using the appropriate conversion.

- If meter reads in gallons, divide ⑦ by 325,851 and enter the result below.
- If meter reads in cubic feet, divide ⑦ by 43,560 and enter the result below.
- If meter reads in acre-feet, no conversion is necessary.

ACRE FEET	144.02

9. If your meter malfunctioned during the year, enter the estimate of withdrawals in acre-feet made during the out-of-service period, as indicated on Meter Malfunction report.

BREAKDOWN ESTIMATE	Ø

10. Add ⑧ and ⑨ and enter result below and in column 4 of Schedule A for each well measured.

TOTAL IN ACRE-FEET	144.02

ARIZONA DEPARTMENT OF WATER RESOURCES

15 South 15th Avenue, Phoenix, Arizona 85007

FIFE SYMINGTON
Governor

RITA P. PEARSON
Director

January 15, 1994

Dear Groundwater Right Owner:

Enclosed are your Annual Water Withdrawal and Use Report forms for calendar year 1993. This report is for service area right holders and irrigation districts who withdraw groundwater from their own wells, who may receive water from others, and who may deliver water to other right holders or individual users. The Department has preprinted certain information from our records onto these forms. Please pay particular attention to schedules and worksheets. If any of the preprinted information is incorrect, please make the necessary changes. Please note that a separate annual report must be filed for each right you own or lease. Separate checks should be enclosed to cover the fees associated with each right and the right number should be written on the check.

The Groundwater Code requires that each person who owns a right to withdraw groundwater in an **Active Management Area** must file an annual report, even if no groundwater was used. Persons who did not withdraw water during 1993 are required to return the forms with zeros in the appropriate blanks.

Reports must be received by the Department or postmarked no later than March 31, 1994. The penalty for filing late is $25.00 per month or part of a month that the report is late up to $150.00. In addition, if you withdrew groundwater, and did not pay the fee on time or did not pay the proper fee, the penalty is 10% of the unpaid fee per month or part of a month that the fees are delinquent, up to a maximum of 60% of the unpaid balance.

If your water right has been sold, both the buyer and seller are responsible for notifying the Department of the conveyance. **The owner of the right as of December 31, 1993 is reponsible for filing an annual report covering the entire calendar year.** Please contact your AMA office for conveyance forms and instructions.

We have tried to provide you with the proper forms according to information in our files. The law does specify, however, that failure to receive the proper forms does not relieve a person of the responsibility of keeping the required records or filing the required reports. You may want to copy this report for your records.

If you need help or have questions, contact your AMA office listed on the Summary page of your report.

Sincerely,

Herb Dishlip

Herb Dishlip
Deputy Director
Water Management

INSTRUCTIONS

If any information pre-printed on this form is incorrect, please make the needed corrections. For that information not already pre-printed on this form, please follow the directions below.

Irrigation Grandfathered Right Holders - Use Part I for all water received from an irrigation district. Spill water will not be charged to your flexibility account. If you have any questions regarding your flexibility account, contact DWR for more information.

Municipal Providers - Use Part I for the water received from an irrigation district, including CAP water from an irrigation district. Use Part III for CAP water received from CAWCD or from another municipal provider. Spill water and effluent will not be used to determine compliance with your GPCD target.

Type 1 Rights - Do not report sources other than groundwater. If you receive groundwater from a source other than an irrigation district, the amount of water received from each well must be reported. Other sources of water need to be reported on a supplemental schedule.

Type 2 Rights and Groundwater Withdrawal Permits - Do not report sources other than groundwater. The amount of groundwater received from each well must be reported. Any well used must be reported. Any well used must be listed on your Type 2 certificate or groundwater withdrawal permit. Other sources of water need to be reported on a supplemental schedule.

ARIZONA DEPT. OF WATER RESOURCES

INSTRUCTIONS

If any information pre-printed on this form is incorrect, please make the needed corrections. For that information not already preprinted on this form, please follow the directions below.

Enter owner name and groundwater right number, if not already shown, in [1]

Enter DWR well registration number and location of each well, if not already shown, in [2]

Enter power company name, account number and meter number, if not already shown, in [3]

Enter device type used to measure withdrawals, if not already shown, in [4] (see list below).

If energy meter serves uses other than the well, indicate "Y" in [5]; if energy meter does not serve other uses (meter is dedicated to the well) indicate "N" in [5]

Enter energy consumed by well and units of measure from appropriate worksheet in [6]

If device types 2 through 6 are used, indicate the average discharge and divider or total hours from the appropriate worksheet in [7] and [8]

Enter total acre-feet of groundwater withdrawn for each well, as calculated on attached worksheets, in [9]

Enter grand total acre-feet withdrawn in [10] and in Part I of the Summary Page.

DEVICE TYPE

1. Pumpage measured by meter or other totalizer/recorder devices (use worksheet W-1)
2. Pipeflow with pumpage calculated using electrical energy records (use worksheet W-2)
3. Pipeflow with pumpage calculated using natural gas energy records (use worksheet W-3)
4. Open channel flow with pumpage calculated using electrical energy records (use worksheet W-4)
5. Open channel flow with pumpage calculated using natural gas energy records (use worksheet W-5)
6. Pumpage calculated using hour meters (use worksheet W-6)

MEASURING DEVICE MALFUNCTION

Pursuant to A.C.R.R. R12-15-905, a measuring device that fails to perform for more than seventy two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken within 30 days, and estimates of withdrawals made during the period the device was out of service must be provided. A Measuring Device Malfunction Report is available on request.

NOTE: A WORKSHEET MUST BE ATTACHED FOR EACH WELL FROM WHICH WATER WAS WITHDRAWN.

PUMPAGE MEASURED BY METER OR OTHER TOTALIZER RECORDER DEVICES

INSTRUCTIONS

1. Enter DWR Well Registration No. & Location in [1].

2. Enter type, make & model of measuring device used to measure flow in [2]. If the measuring device is permanent, enter date installed or last overhauled.

3. Enter power company name, account number, meter number and total energy consumption in [3]. Indicate units as KWH, therms or other measurement.

4. Indicate whether the energy meter serves other uses in [4].

5. Enter initial totalizer reading as of January 1, in [5]. If your meter reads in 10's, 100's, or 1000's of units, be sure to add the correct number of zeroes.

6. Enter ending reading as of December 31, in [6]. If the totalizer dial has rolled over during the year, enter the number 1 in front of the reading, if twice, a 2, etc.

7. Subtract reading in [5] from reading in [6] and enter the difference in [7].

8. Convert the Total Amount Pumped to acre feet by using the appropriate conversion; enter the result in [8].
   - If meter reads in gallons, divide [7] by 325,851
   - If meter reads in cubic feet, divide [7] by 43,560
   - If meter reads in acre-feet, no conversion is necessary

9. If your meter malfunctioned during the year, enter the estimate of withdrawals in acre-feet made during the out-of-service period in [9].

10. Add [8] and [9] and enter result in [10].

ENTER THE FOLLOWING ON SCHEDULE A OR PART I OF SCHEDULE A-ISR

WORKSHEET		SCHEDULE A
Item 1	–	DWR Well Reg No. & Location in Col [2], if not already shown.

MEASURING DEVICE MALFUNCTION

Pursuant to A.C.R.R. R12-15-905, a measuring device that fails to perform for more than seventy two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken as soon as practicable, and estimates of withdrawals made during the period the device was out of service must be provided. A Measuring Device Malfunction Report is available on request.

PUMPAGE MEASURED BY METER OR OTHER TOTALIZER RECORDER DEVICES

DWR-AR-9-89

GROUNDWATER RIGHT/PERMIT NO.
56-000324.0000

READ INSTRUCTIONS CAREFULLY

1. Enter DWR Well Registration No. & Location.

DWR WELL REGISTRATION NO.	LOCATION Q	Q	Q	Sec	Twn	Rng
55-605197	SE	SE	SW	01	13OS	13OE

2. Enter type, make & model of measuring device used to measure flow. If measuring device is permanent, enter date installed or last overhauled.

TYPE OF MEASURING DEVICE	MAKE
Totalizer	ARRON
MODEL	SIZE
—	3"
UNITS MEASURED	INSTALLATION ~~OR OVERHAUL~~ DATE
Gallons	1988

3. Enter Power Co. Name, Account No., Meter No. and total energy consumption. Indicate units as KWH, therms or other measurement.

POWER CO. NAME	ACCOUNT NO.	POWER METER NO.
TEP	144249921	AA588

ENTER TOTAL ENERGY CONSUMPTION IN COLUMN 6 OF SCHEDULE A	ENERGY CONSUMPTION	UNITS
	145,680	KWH

4. Does Energy Meter serve uses other than the well pump? ☐ YES ☑ NO
Enter "Y" or "N" in column 7 of Schedule A

5. Enter water reading as of January 1, in ⑤. If your meter reads in 10s, 100s, or 1000s of units, be sure to add the correct number of zeros.

6. Enter ending reading as of December 31, in ⑥. If the totalizer dial has rolled over during the year, enter the number 1 in front of the reading, if twice, a 2, etc.

7. Subtract reading in ⑤ from reading in ⑥ and enter the difference in ⑦.

WATER TOTALIZING METER READINGS		
⑤ INITIAL	⑥ ENDING	⑦ DIFFERENCE
45,886,060	80,519,100	34,633,040

If meter was replaced during the year, indicate beginning and ending reading for each meter.

8. Convert the Total Amount Pumped to acre feet by using the appropriate conversion.

- If meter reads in gallons, divide ⑦ by 325,851 and enter the result below.
- If meter reads in cubic feet, divide ⑦ by 43,560 and enter the result below.
- If meter reads in acre-feet, no conversion is necessary.

ACRE FEET	106.3

9. If your meter malfunctioned during the year, enter the estimate of withdrawals in acre-feet made during the out-of-service period, as indicated on Meter Malfunction report.

BREAKDOWN ESTIMATE	Ø

10. Add ⑧ and ⑨ and enter result below and in column 4 of Schedule A for each well measured.

TOTAL IN ACRE-FEET	106.3

SCHEDULE A

REPORT OF GROUNDWATER WITHDRAWALS
AMA - TUCSON

RECEIVED APR 1 1 1990

ARIZONA DEPT. OF WATER RESOURCES
DWR-AR-2-89

INSTRUCTIONS

Enter groundwater right number and owner name, if not already shown, in (1)
Enter DWR well registration number and location of each well, if not already shown, in (2)
Enter power company name, account number and meter number, if not already shown, in (3)
Enter total acre-feet of groundwater withdrawn for each well, as calculated on attached worksheets, in (4)
Enter grand total acre-feet withdrawn in (10) and in Part I of the Summary Page
Enter device type used to measure withdrawals, if not already shown, in (5) (see list below).
Enter energy consumed by well and units of measure from appropriate worksheet in (6)
If energy meter serves uses other than the well, indicate "Y" in (7) If energy meter does not serve other uses (meter is dedicated to the well) indicate "N" in (7)
If device types 2 through 6 are used, indicate the average discharge and divider or total hours from the appropriate worksheet in (8) and (9)

DEVICE TYPE

1. Pumpage measured by meter or other totalizer/recorder devices (use worksheet W-1)
2. Pipeflow with pumpage calculated using electrical energy records (use worksheet W-2)
3. Pipeflow with pumpage calculated using natural gas energy records (use worksheet W-3)
4. Open channel flow with pumpage calculated using electrical energy records (use worksheet W-4)
5. Open channel flow with pumpage calculated using natural gas energy records (use worksheet W-5)
6. Pumpage calculated using hour meters (use worksheet W-6)

(1) GROUNDWATER RIGHT/PERMIT NO.

MEASURING DEVICE MALFUNCTION

Pursuant to A.C.R.R. R12-15-905, a measuring device that fails to perform for more than seventy two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken as soon as practicable, and estimates of withdrawals made during the period the device was out of service must be provided. A Measuring Device Malfunction Report is available on request.

SCHEDULE E

WATER RECEIVED FROM OTHER SOURCES

AMA - TUCSON

RECEIVED APR 1 1 1990

ARIZONA DEPT. OF WATER RESOURCES
DWR-AR-6-89

INSTRUCTIONS

Enter Groundwater Right No. which received groundwater from other sources and the Owner's Name of this Right No. in (1)

Enter the Right No. of the person delivering the water, the DWR well registration number of the well delivering water, how measured or estimated and the acre feet received in (2). If you do not know the registration number, contact DWR for this information. Do not include irrigation district wells.

Enter in (3) the name of the irrigation district, the provider number of the district, your district user/account number, the acreage eligible to receive surface water and the amount of each type of water received

Enter in items (4) through (7) the information requested in those sections.

Add the total annual acre feet received from items (2) through (7) to obtain the total water received from other sources, and enter in Item (8)

Enter annual total acre feet of received and diverted water from (8) in PART III on Summary Page.

PUMPAGE MEASURED BY METER OR OTHER TOTALIZER RECORDER DEVICES

DWR-AR-9-89

GROUNDWATER RIGHT/PERMIT NO. 56-000324.0000

RECEIVED APR 11 1990

READ INSTRUCTIONS CAREFULLY

1. Enter DWR Well Registration No. & Location.

DWR WELL REGISTRATION NO.	LOCATION Q	Q	Q	Sec	Twn	Rng
55-605197	SE	SE	SW	1	13S	13E

2. Enter type, make & model of measuring device used to measure flow. If measuring device is permanent, enter date installed or last overhauled.

TYPE OF MEASURING DEVICE	MAKE
Flowmeter	Rockwell
MODEL: W-350	SIZE: 3"
UNITS MEASURED: GALLONS	INSTALLATION OR OVERHAUL DATE: 1-27-89

3. Enter Power Co. Name, Account No., Meter No. and total energy consumption. Indicate units as KWH, therms or other measurement.

POWER CO. NAME	ACCOUNT NO.	POWER METER NO.
T.E.P. OWN METER	154675822	3HC 147

ENTER TOTAL ENERGY CONSUMPTION IN COLUMN 6 OF SCHEDULE A	ENERGY CONSUMPTION	UNITS

4. Does Energy Meter serve uses other than the well pump? ☐ YES ☐ NO
Enter "Y" or "N" in column 7 of Schedule A

5. Enter water reading as of January 1, in ⑤. If your meter reads in 10s, 100s, or 1000s of units, be sure to add the correct number of zeros.

6. Enter ending reading as of December 31, in ⑥. If the totalizer dial has rolled over during the year, enter the number 1 in front of the reading, if twice, a 2, etc.

7. Subtract reading in ⑤ from reading in ⑥ and enter the difference in ⑦.

1-29-89 WATER TOTALIZING METER READINGS		
⑤ INITIAL	12-29-89 ⑥ ENDING	⑦ DIFFERENCE
0	41,695,000	41,695,000

If meter was replaced during the year, indicate beginning and ending reading for each meter.

8. Convert the Total Amount Pumped to acre feet by using the appropriate conversion.

- If meter reads in gallons, divide ⑦ by 325,851 and enter the result below.
- If meter reads in cubic feet, divide ⑦ by 43,560 and enter the result below.
- If meter reads in acre-feet, no conversion is necessary.

ACRE FEET	127.95

9. If your meter malfunctioned during the year, enter the estimate of withdrawals in acre-feet made during the out-of-service period, as indicated on Meter Malfunction report.

W-2 12-29-88 TO 1-29-89

BREAKDOWN ESTIMATE	9.32

10. Add ⑧ and ⑨ and enter result below and in column 4 of Schedule A for each well measured.

TOTAL IN ACRE-FEET	137

THIS WORKSHEET MUST BE SUBMITTED WITH SCHEDULE A

THE INFORMATION CONTAINED IN THIS REPORT WAS PROVIDED AND COMPILED BY THE CUSTOMER OR THEIR ENERGY SUPPLIER.

PIPE FLOW WITH PUMPAGE CALCULATED USING ELECTRICAL ENERGY RECORDS

NOTE: This method cannot be used when energy meter serves other uses.

DWR-AR-10-88

GROUNDWATER RIGHT/PERMIT NO. 56-000324.0000

READ INSTRUCTIONS CAREFULLY

1. Enter DWR Well Registration No. & Location.

DWR WELL REGISTRATION NO.	LOCATION Q	Q	Q	Sec	Twn	Rng
55-605197	SE	SE	SW	1	13S	13E

2. Enter type, make, model & size of measuring device used to measure pipe flow. If measuring device is permanent, enter date installed or last overhauled.

TYPE OF MEASURING DEVICE	MAKE
Annubar Eagle Eye	Dieterich Standard
MODEL: ANR 75 C-9810	SIZE: 4"
INSTALLATION OR OVERHAUL DATE:	

3. Enter Power Co. Name & Account No. & Meter No.

POWER CO. NAME	ACCOUNT NO.	ELECTRIC METER NO.
Own Meter	154675822	3HC 147

4. Enter Kr & Kh from electric meter.
   * The Kr is the multiplier factor indicated on the power bill. For some pump motors, which are 200 amps or less, the electric meter may be "self-contained," and the Kr is not used in computing Factor A (Kh = Factor A). Contact the metering department of your electric company to determine if your electric meter is self-contained, if you are not sure.

   The Kh is the disk constant and is located on faceplate of the electric meter.

Kr	Kh
1	57.6

5. Compute Factor A by multiplying Kr by Kh.
   FACTOR A = 57.6 = Kr x Kh
6. Enter the inside diameter of the well discharge pipe (inches).
   INSIDE DIAMETER 4.026 (inches)
7. Enter date of measurement, differential or velocity head of the pipe flow, pump discharge, and the number of seconds it takes to turn the electric meter disk 10 revolutions, for each measurement. **A MINIMUM OF TWO MEASUREMENTS IS REQUIRED.** These measurements should be taken during the spring and in late summer if possible. Measuring more often produces more accurate results. It is desirable to operate the pump at least 24 hours before measuring the discharge.

DATE OF MEASUREMENT	DIFFERENTIAL or VELOCITY HEAD (Specify Units)	DISCHARGE (Gals./Min.)	NO. OF SECONDS FOR 10 REVS
6-29-88	8.3"	197	73
12-29-88	8.2"	196	73
A MINIMUM OF TWO MEASUREMENTS IS REQUIRED	**TOTALS**	393	146

8. Add the values in the discharge column and divide by the number of entries to obtain the average discharge which is designated as Factor B.
   AVE. DISCHARGE 197 FACTOR B.
9. Repeat the same procedure for the no. of seconds column to obtain the average seconds which is designated as Factor C.
   AVE. SECONDS 73 FACTOR C.
10. Enter Factor A, Factor B, and Factor C in the formula provided. Complete the calculation as shown to obtain the divider.
    DIVIDER = 19,500 x $\frac{A \times 10}{B \times C}$ = 783
11. Enter ending electric meter reading 9934 KWH.
12. Enter the total Energy Consumption. This amount may be obtained from your electric energy bills. If you obtain this information by reading your meter, be sure to adjust the reading by the "multiply by" factor on your bill.
    ENERGY CONSUMPTION FOR THE YEAR 116,610 Kw hrs

    THE INFORMATION CONTAINED IN THIS REPORT WAS PROVIDED AND COMPILED BY THE CUSTOMER OR THEIR ENERGY SUPPLIER.
13. Divide the total Energy Consumption entered in Item 12 by the value computed in Item 10 to obtain the total Groundwater Withdrawn by the well.
    GROUNDWATER WITHDRAWN = $\frac{\text{LINE 12}}{\text{LINE 10}}$ = 149 ACRE FEET

ENTER THE FOLLOWING ON SCHEDULE A

- Item 1 - DWR Well Reg No. & Location in Col ②
- Item 3 - Power Co. Name, Acct. No. and Meter No. in Col ③
- Item 8 - Average Discharge in Col ⑧.
- Item 10 - Divider in Col ⑨.
- Item 12 - Energy Consumption in Col ⑥.
- Item 13 - Groundwater withdrawn in Col ④.

SCHEDULE A

REPORT OF GROUNDWATER WITHDRAWALS

ARIZONA DEPT. OF WATER RESOURCES
DWR-AR2-87

INSTRUCTIONS

Enter groundwater right number and owner name, if not already shown, in (1)
Enter DWR well registration number and location of each well, if not already shown, in (2)
Enter power company name, account number and meter number, if not already shown, in (3)
Enter total acre-feet of groundwater withdrawn for each well, as calculated on attached worksheets, in (4)
Enter grand total acre-feet withdrawn in (10) and in Part I of the Summary Page
Enter device type used to measure withdrawals, if not already shown, in (5) (see list below).
Enter energy consumed by well and units of measure from appropriate worksheet in (6)
If energy meter serves uses other than the well, indicate "Y" in (7) . If energy meter does not serve other uses (meter is dedicated to the well) indicate "N" in (7)
If device types 2 through 6 are used, indicate the average discharge and divider or total hours from the appropriate worksheet in (8) and (9) .

DEVICE TYPE

1. Pumpage measured by meter or other totalizer/recorder devices (use worksheet W-1)
2. Pipeflow with pumpage calculated using electrical energy records (use worksheet W-2)
3. Pipeflow with pumpage calculated using natural gas energy records (use worksheet W-3)
4. Open channel flow with pumpage calculated using electrical energy records (use worksheet W-4)
5. Open channel flow with pumpage calculated using natural gas energy records (use worksheet W-5)
6. Pumpage calculated using hour meters (use worksheet W-6)

MEASURING DEVICE MALFUNCTION

Pursuant to A.C.R.R. R12-15-905, a measuring device that fails to perform for more than seventy two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken as soon as practicable, and estimates of withdrawals made during the period the device was out of service must be provided. A Measuring Device Malfunction Report is available on request.

SCHEDULE E

WATER RECEIVED FROM OTHER SOURCES

ARIZONA DEPT. OF
WATER RESOURCES
DWR-AR6-87

INSTRUCTIONS

Enter Groundwater Right No. which received groundwater from other sources and the Owner's Name of this Right No. in (1)

Enter the Right No. of the person delivering the water, the DWR well registration number of the well delivering water, how measured or estimated and the acre feet received in (2). If you do not know the registration number, contact DWR for this information. Do not include irrigation district wells.

Enter in (3) the name of the irrigation district, the provider number of the district, your district user/account number, the acreage eligible to receive surface water and the amount of each type of water received

Enter in items (4) through (7) the information requested in those sections.

Add the total annual acre feet received from items (2) through (7) to obtain the total water received from other sources, and enter in Item (8)

Enter annual total acre feet of received and diverted water from (8) in PART III on Summary Page.

(1) GROUNDWATER RIGHT NO.: 56-000324

ARIZONA DEPT. OF WATER RESOURCES

WORKSHEET W-2

GROUNDWATER RIGHT NO. 78-107285

PIPE FLOW WITH PUMPAGE CALCULATED USING ELECTRICAL ENERGY RECORDS

DWRAR 10-84

NOTE: This method cannot be used when energy meter serves other uses.

INSTRUCTIONS

1. Enter DWR Well Registration No. & Location. Enter in (1).
2. Enter type, make, model & size of measuring device used to measure pipe flow. If measuring device is permanent, enter date installed or last overhauled. Enter in (2).
3. Enter Power Co. Name & Account No. & Meter No. Enter in (3).
4. Enter Kr & Kh from electric meter. Enter in (4).*
5. Compute Factor A by multiplying Kr by Kh. Enter in (5).
6. Enter the inside diameter of the well discharge pipe (inches). Enter in (6).
7. Enter date of measurement, differential or velocity head of the pipe flow, pump discharge, and the number of seconds it takes to turn the electric meter disk 10 revolutions, for each measurement. **A MINIMUM OF TWO MEASUREMENTS IS REQUIRED.** These measurements should be taken during the spring and in late summer if possible. Measuring more often produces more accurate results. It is desirable to operate the pump at least 24 hours before measuring the discharge. Enter in (7).
8. Add the values in the discharge column and divide by the number of entries to obtain the average discharge which is designated as Factor B. Enter in (8).
9. Repeat the same procedure for the no. of seconds column to obtain the average seconds which is designated as Factor C. Enter in (9).
10. Enter Factor A, Factor B, and Factor C in the formula provided. Complete the calculation as shown to obtain the divider. Enter in (10).
11. Enter the total Energy Consumption. This amount may be obtained from your electric energy bills. If you obtain this information by reading your meter, be sure to adjust the reading by the "multiply by" factor on your bill. Enter in (11).
12. Divide the total Energy Consumption entered in Item 11 by the value computed in Item 10 to obtain the total groundwater withdrawn by the well. Enter in (12).

* The Kr is the multiplier factor indicated on the power bill. For some pump motors, which are 200 amps or less, the electric meter may be "self-contained," and the Kr is not used in computing Factor A (Kh-Factor A). Contact the metering department of your electric company to determine if you electric meter is self-contained, if you are not sure.

Enter Groundwater Right No. which received groundwater from wells not owned by you, and the Owner's Name of this Groundwater Right No. in (1)

Enter the Right Number of the person delivering the water, the DWR well registration number of the well delivering water, how measured or estimated and the acre feet received in (2). If you do not know the registration number, contact DWR for this information. Do not include irrigation district wells.

Enter in (3) the name of the irrigation district, the provider number of the district, your district user/account number, the type of water and amount and the total acre feet received.

Enter in Items (4) through (7) the information requested in those sections.

Add the total annual acre feet received from Items (2) through (7) to obtain the total water received from other sources, and enter in Item (8).

Enter annual total acre feet of received and diverted water from (8) in PART III on Summary Page.

MEASURING DEVICE MALFUNCTION

Pursuant to A.C.R.R. R12-15-905, a measuring device that fails to perform for more than seventy two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken as soon as practicable, and estimates of withdrawals made during the period the device was out of service must be provided. A Measuring Device Malfunction Report is available on request.

WORKSHEET W-2 ELECTRICAL ENERGY

PIPE FLOW WITH PUMPAGE CALCULATED USING ELECTRICAL ENERGY RECORDS

DWRAR10-84

INSTRUCTIONS

1. Enter DWR Well Registration No. & Location. Enter in ①.
2. Enter type, make, model & size of measuring device used to measure pipe flow. If measuring device is permanent, enter date installed or last overhauled. Enter in ②.
3. Enter Power Co. Name & Acct. No. & Meter No. Enter in ③.
4. Enter Kr & Kh from Electric Meter. Enter in ④.
5. Compute Factor A by multiplying Kr by Kh. Enter in ⑤.
6. Enter inside diameter of the well discharge pipe (inches). Enter in ⑥.
7. Enter the date of measurement, differential or velocity head of the pipe flow, pump discharge, and the number of seconds it takes to turn the electric meter disk 10 revolutions, for each measurement. A minimum of two measurements is required. These measurements should be taken during the spring and in late summer if possible. Measuring more often produces more accurate results. It is desirable to operate the pump at least 24 hours before measuring the discharge. Enter in ⑦.
8. Add the values in the discharge column and divide by the number of entries to obtain the average discharge which is designated as Factor B. Enter in ⑧.
9. Repeat the same procedure for the no. of seconds column to obtain the average seconds which is designated as Factor C. Enter in ⑨.
10. Enter Factor A, Factor B, and Factor C in the formula provided. Complete the calculation as shown to obtain the divider. Enter in ⑩.
11. Enter the total Energy Consumption. This amount may be obtained from your electrical energy bills. If you obtain this information by reading your meter, be sure to adjust the reading by the "multiply by" or Kr factor of the meter. Enter in ⑪.
12. Divide the total Energy Consumption entered in Item 11 by the value computed in Item 10 to obtain the total groundwater withdrawn by the well. Enter in ⑫.

Dear Mr. Behm,

We have reviewed your request to waive late fees associated with your amended 1984 and 1985 annual report filings. Your circumstances, while unfortunate, do not constitute grounds for waiving these late fees.

Please submit payment in the amount of $83.11 ($47.11 for 1985 and $36.00 for 1986) no later than October 7, 1987. If you have any questions, please contact Steve Rossi at the Tucson AMA office (628-5858). Thank you for your cooperation.

Sincerely,

Herb Dishlip

FROM: Steve Rossi

DATE: September 4, 1987

RE: Waiver Request - Beznos Management (56-000324.0000)

In the attached letter, Ross Behm, Property Manager for Beznos Management, is requesting the waiver of late fees on 1985 and 1986 annual reports as amended on September 3, 1987. These reports were amended based on errors discovered through an audit. The errors, which consisted of the use of ending electric meter readings instead of actual kilowatt-hour consumption, resulted in underaccounting of pumpage and associated withdrawal fees for both calendar years. The waiver is being requested on the grounds that the figures were wrongly interpreted in communications between the measuring service representative and the pump maintenance person.

The measuring service handling Beznos has previously been encouraged to check figures and contact this office when questions arise. It is unfortunate that Beznos must pay for measuring service errors, though it is ultimately the owner's responsibility to assure accurate record keeping.

I feel their are no extenuating circumstances involved in this case and therefore recommend denial of the request.

Lester Snow

Re: 1985 & 1986 Water withdrawal use fees Oracle Villa and Mission Palms

Dear Herb,

During audit of our records of water use at Oracle Villa and Mission Palms wells it was discovered that for 1985 + 1986 the energy use reported was the "meter reading" at the end of the year rather than the actual energy use for the year.

Amended reports are being filed with the correct usage. Jim Grey our well engineer had called to Brad Despain (who does the calculations on the reports) the meter readings at years end. Brad understood it to be the year's energy usage. Therefore; incorrect usage was being reported.

Due to this honest mistake Beznos Management now has to pay additional fees. I am asking for a waiver of penalties on the additional fees on the amended annual report.

Thank you for your consideration.

Ross Behm
Property Mgr Beznos Mgt.

ARIZONA DEPARTMENT OF WATER RESOURCES

TUCSON ACTIVE MANAGEMENT AREA

OFFICIAL NOTICE OF MUNICIPAL CONSERVATION REQUIREMENTS AND MONITORING AND REPORTING REQUIREMENTS - EXISTING LARGE PROVIDER

Pursuant to A.R.S. § 45-564.B, the Director of Water Resources hereby gives notice of the conservation requirements and monitoring and reporting requirements that apply to Beznos Management, a municipal provider in the Tucson Active Management Area.

The date of this Notice is December 30, 1984. Compliance with these conservation requirements must generally be achieved beginning January 1, 1987 and must be maintained until the effective date of any new conservation requirements established in the second Management Plan for the Tucson Active Management Area.

1. Per Capita Conservation Requirement

Beznos Management, as an existing large provider whose 1980 GPCD rate is 159 GPCD, shall achieve, for the first full calendar year following the compliance date, a GPCD rate equal to or less than 154 GPCD and shall maintain a GPCD rate equal to or less than 154 GPCD until the effective date of any applicable per capita conservation requirements prescribed in the second management plan. Compliance with the assigned maximum GPCD rate shall be determined pursuant to section 4 of this Notice.

2. Definitions

a. In this Notice, unless the context otherwise requires:

(1) "Compliance date" means the date that falls two years after the date of the notice of the applicable conservation requirements pursuant to A.R.S. § 45-564. The compliance date is December 31, 1986.

(2) "Conservation technology" means any device or practice or any combination of devices and practices that, when properly implemented, reduces groundwater withdrawals.

(3) "Contiguous" means in contact at any point along a boundary. Two parcels of land are contiguous if they are

separated by only one or more of the following: a road, highway, easement or right-of-way.

(4) "Dwelling unit" means a group of rooms or a single room occupied as separate living quarters. Dwelling unit includes a single family home, a patio home, a townhouse, a condominium, an apartment, a permanently set-up mobile home and a unit in a multi-family home. Dwelling unit does not include a mobile home in an overnight or limited-stay mobile home park or a unit in a campground, motel, hotel or other temporary lodging facility. A dwelling unit may be occupied by a family, a family and unrelated persons living together, two or more unrelated persons living together or by one person.

(5) "Effective date of this management plan" means the date of the second publication of the summary of the management plan, findings and order pursuant to A.R.S. § 45-571.C. The effective date of this management plan is December 26, 1984.

(6) "Existing large provider" means a municipal provider that commenced serving non-irrigation uses on or before January 1, 1980 and served 500 or more people as of 1980.

(7) "Existing municipal distribution system" means a municipal distribution system that is in operation as of the effective date of this management plan or for which substantial capital investment has been made in the physical on-site construction of the system in the twelve months prior to the effective date of this management plan.

(8) "Existing small provider" means a municipal provider that commenced serving non-irrigation uses on or before January 1, 1980 and served less than 500 people as of 1980.

(9) "Existing turf-related facility" means:

(a) A turf-related facility that, as of the effective date of this management plan, is in operation or has obtained all preconstruction permits and approvals required by federal, state or local governments, or for which substantial capital investment has been made in the physical on-site construction of the facility in the twelve months prior to the effective date of this management plan.

(b) An expansion or modification of a turf-related facility that qualifies as an existing turf-related facility under part (a) of this definition, if that expansion or modification increases the area of land to which water is applied for turf-related watering purposes and has been substantially commenced as of the effective date of this management plan. An expansion or modification has been substantially commenced if the owner or operator of the facility has obtained all preconstruction permits or approvals required by federal, state or local governments for that expansion or modification or has made a substantial capital investment in the physical on-site construction of the expansion or modification in the twelve months prior to the effective date of this management plan.

(10) "Future provider" means a municipal

separated by only one or more of the following: a road, highway, easement or right-of-way.

(4) "Dwelling unit" means a group of rooms or a single room occupied as separate living quarters. Dwelling unit includes a single family home, a patio home, a townhouse, a condominium, an apartment, a permanently set-up mobile home and a unit in a multi-family home. Dwelling unit does not include a mobile home in an overnight or limited-stay mobile home park or a unit in a campground, motel, hotel or other temporary lodging facility. A dwelling unit may be occupied by a family, a family and unrelated persons living together, two or more unrelated persons living together or by one person.

(5) "Effective date of this management plan" means the date of the second publication of the summary of the management plan, findings and order pursuant to A.R.S. § 45-571.C. The effective date of this management plan is December 26, 1984.

(6) "Existing large provider" means a municipal provider that commenced serving non-irrigation uses on or before January 1, 1980 and served 500 or more people as of 1980.

(7) "Existing municipal distribution system" means a municipal distribution system that is in operation as of the effective date of this management plan or for which substantial capital investment has been made in the physical on-site construction of the system in the twelve months prior to the effective date of this management plan.

(8) "Existing small provider" means a municipal provider that commenced serving non-irrigation uses on or before January 1, 1980 and served less than 500 people as of 1980.

(9) "Existing turf-related facility" means:

(a) A turf-related facility that, as of the effective date of this management plan, is in operation or has obtained all preconstruction permits and approvals required by federal, state or local governments, or for which substantial capital investment has been made in the physical on-site construction of the facility in the twelve months prior to the effective date of this management plan.

(b) An expansion or modification of a turf-related facility that qualifies as an existing turf-related facility under part (a) of this definition, if that expansion or modification increases the area of land to which water is applied for turf-related watering purposes and has been substantially commenced as of the effective date of this management plan. An expansion or modification has been substantially commenced if the owner or operator of the facility has obtained all preconstruction permits or approvals required by federal, state or local governments for that expansion or modification or has made a substantial capital investment in the physical on-site construction of the expansion or modification in the twelve months prior to the effective date of this management plan.

(10) "Future provider" means a municipal

provider that commences serving non-irrigation uses on or after January 1, 1985.

(11) "GPCD rate" means the gallons per capita per day rate for all non-irrigation uses supplied by a municipal provider. The GPCD rate for a municipal provider shall be calculated on a calendar year basis pursuant to the method set forth in section 3 of this Notice.

(12) "Industrial user" means a person who uses for a non-irrigation purpose, including animal industry use and expanded animal industry use, any groundwater not supplied by a city, town or private water company.

(13) "Landscape watering" means the application of water from any source to grow landscaping plants.

(14) "Landscaping plant" means any member of the kingdom Plantae, including any tree, shrub, vine, herb, flower, succulent, groundcover or grass species, that grows or has been planted out-of-doors and is used for landscaping purposes.

(15) "Lost water" means water from any source that enters a municipal distribution system and is lost from the system due to seepage, evaporation, leaks, breaks or other causes.

(16) "Municipal distribution system" means a system of pipes, canals or other works owned or operated by a municipal provider to collect, store, treat or deliver groundwater for non-irrigation use.

(17) "Municipal provider" means a city, town, private water company or irrigation district that supplies water for non-irrigation use.

(18) "New municipal distribution system" means a municipal distribution system that is not an existing municipal distribution system.

(19) "New provider" means a municipal provider that commenced serving non-irrigation uses after January 1, 1980 but before January 1, 1985.

(20) "New turf-related facility" means:

(a) A turf-related facility that does not qualify as an existing turf-related facility under part (a) of the definition of an existing turf-related facility.

(b) An expansion or modification of a turf-related facility that qualifies as a new turf-related facility under part (a) of this definition, if that expansion or modification increases the area of land to which water is applied for turf-related watering purposes.

(c) An expansion or modification of an existing turf-related facility, if that expansion or modification increases the area of land to which water is applied for turf-related watering purposes and has not been substantially commenced as of the effective date of this management plan.

(21) "Newly turfed area" means the area of land newly planted during the calendar year in question with a grass species that requires additional water for germination and establishment. Newly turfed area does not include an area covered with a grass species during the preceding calendar year

that has been overseeded or reseeded with a grass species during the calendar year in question.

(22) "Non-residential use" means a non-irrigation use of water other than a residential use.

(23) "Residential use" means a non-irrigation use of water that is related to the supply, service and activities, including landscape watering, of a dwelling unit.

(24) "Special provider" means a municipal provider designated by the Director as a special provider pursuant to section 6 of this Notice.

(25) "Total landscaped area" means:

(a) With respect to an existing turf-related facility or a new turf-related facility, except as provided in part (b) of this definition, the area of land to which water from any source is legally applied for landscape watering purposes during the calendar year in question.

(b) With respect to an existing turf-related facility in operation as of the effective date of this management plan, whichever of the following is greater:

(i) The largest area of land to which water from any source was legally applied for landscape watering purposes during any one year from January 1, 1980 through December 31, 1984.

(ii) The area of land to which water from any source is legally applied for landscape watering purposes during the calendar year in question.

(26) "Total quantity of lost and unaccounted for water" means the total quantity of water from any source withdrawn, diverted or received by a municipal provider during a calendar year minus the total quantity of authorized deliveries by the municipal provider of water from any source during that year that are metered deliveries or deliveries that the municipal provider accounts for by a generally accepted method of estimating water use.

(27) "Total water surface area" means the total surface area of all bodies of water from any source, including lakes, ponds and lagoons, that are an integral part of the landscaped area of a turf-related facility. Bodies of water used primarily for swimming purposes are not an integral part of the landscaped area of a turf-related facility.

(28) "Turf-related facility" means a facility that applies water from any source to ten or more acres of land for turf-related watering purposes.

(29) "Turf-related watering" means the application of water from any source to grow landscaping plants on the grounds of a turf-related facility and the use of water from any source to fill or refill any bodies of water, including lakes, ponds or lagoons, that are an integral part of the landscaped area of a turf-related facility. Bodies of water used primarily for swimming purposes are not an integral part of the landscaped area of a turf-related facility.

(30) "Turfed acreage" means the total area of land planted with grass species or with plants not listed on the Low Water Using Plant List for the Tucson Active Management Area

adopted by the Director and filed in the Department.

(31) "Unaccounted for water" means water from any source that enters a municipal distribution system, is not lost water and is not an authorized delivery accounted for by metering or by a generally accepted method of estimating water use. Unaccounted for water includes unauthorized water use and undermeasured water use due to inaccurate meters.

(32) "Water from any source" means any water, including effluent.

b. The applicable definitions in A.R.S. §§ 45-101 and 45-402 are hereby incorporated by reference into this Notice.

3. Calculation of GPCD Rate

The Director shall calculate the GPCD rate for a municipal provider for a given calendar year as follows:

a. Determine the total gallons of water from any source, except effluent, withdrawn, diverted or received by the municipal provider for non-irrigation use during the calendar year.

b. Divide the total gallons of water from any source, except effluent, withdrawn, diverted or received for non-irrigation use by the population of the municipal provider's service area for the calendar year and divide that result by 365. The population of the municipal provider's service area shall be calculated by a method consistent with Executive Order No. 77-5, governing preparation of official population estimates and projections for Arizona.

4. Compliance with Maximum GPCD Rate

A municipal provider is in compliance for a given calendar year with the applicable maximum GPCD rate if the Director determines that either of the following applies:

a. The municipal provider's GPCD rate for that calendar year is equal to or less than the applicable maximum GPCD rate.

b. The municipal provider's average GPCD rate for that calendar year and the preceding two calendar years is equal to or less than the applicable maximum GPCD rate. The average GPCD rate shall be calculated as follows:

(1) Determine the aggregate gallons of water from any source, except effluent, withdrawn, diverted or received by the municipal provider for non-irrigation use during the calendar year in question and the preceding two calendar years. The result is the municipal provider's 3-year aggregate non-irrigation water use.

(2) Determine the population of the municipal provider's service area for that calendar year and each of the preceding two calendar years pursuant to subsection 3.b of this Notice. Determine the sum of those three population figures. The result is the municipal provider's 3-year aggregate service

area population.

(3) Divide the municipal provider's 3-year aggregate non-irrigation water use by the municipal provider's 3-year aggregate service area population and divide that result by 365. The result is the municipal provider's average GPCD for that calendar year and the preceding two calendar years.

5. Modification of Maximum GPCD Rate

A municipal provider that seeks to serve a new non-residential use may apply to the Director for a modification of the applicable maximum GPCD rate. The Director may approve a proposed modification only if the Director determines that extraordinary circumstances justify the modification. The Director may find that extraordinary circumstances justify a modification if the municipal provider demonstrates to the satisfaction of the Director that all of the following apply:

a. The addition of the new non-residential use renders the applicable maximum GPCD rate unreasonable.

b. The municipal provider has implemented an effective conservation program.

c. The new non-residential user will use appropriate conservation technologies.

6. Special Providers

a. A municipal provider that supplies or expects to supply more than 60% of its total non-irrigation deliveries to non-residential uses may apply to the Director for designation as a special provider.

b. An application for designation as a special provider shall be made on a form prescribed and furnished by the Director which shall include the following:

(1) The quantity of water from any source, except effluent, delivered and expected to be delivered annually to residential uses.

(2) The quantity of water from any source delivered and expected to be delivered annually to non-residential uses.

(3) The types of non-residential uses served and expected to be served.

(4) The quantity of water delivered and expected to be delivered annually to each type of non-residential use.

(5) The conservation measures' implemented by the municipal provider as of the date of the application and the conservation measures expected to be implemented by the municipal provider within two years after the date of the application.

(6) Such other information as the Director may require.

c. The Director may approve the designation of a municipal provider as a special provider if the municipal

provider demonstrates to the satisfaction of the Director that the water use pattern of the municipal provider cannot be adequately characterized by a GPCD rate.

d. For each municipal provider designated as a special provider, the Director shall assign mandatory conservation requirements and monitoring and reporting requirements, including a maximum GPCD rate for residential uses served by the provider and appropriate conservation measures for non-residential uses served by the provider. The special provider shall comply with the assigned conservation requirements by a date specified by the Director, which shall be no later than two years from the date of designation as a special provider, and shall remain in compliance with those requirements until the effective date of any applicable conservation requirements prescribed in the second management plan.

7. Conservation Measures Appropriate for Individual Users

a. On and after the compliance date, a municipal provider shall not serve any groundwater for the purpose of filling or refilling all or a portion of any body of water, including a lake, pond, lagoon or swimming pool, that has a surface area greater than 12,320 square feet and that is used for landscape, scenic or recreational purposes except:

(1) Where the body of water has been filled as of the compliance date or where substantial capital investment has been made in the physical on-site construction of the body of water in the twelve months prior to the compliance date.

(2) Where the body of water is located in a public recreational facility owned or operated by federal, state or local government.

(3) Where effluent is used to fill and refill the body of water.

b. On and after the compliance date, a municipal provider shall not serve any groundwater for the purpose of watering landscaping plants planted on or after the compliance date within the right-of-way of any public street or highway or on the grounds of a rest area established and maintained by federal, state or local government adjacent to the right-of-way of any public street or highway for the convenience of the traveling public, unless the plants are listed on the Low Water Using Plant List for the Tucson Active Management Area adopted by the Director and filed in the Department. Attachment 1 sets forth the procedure for modification of the Low Water Using Plant List.

c. On and after the compliance date, a municipal provider shall not serve to a turf-related facility for turf-related watering purposes more water than required to achieve the applicable maximum annual water allotment.

(1) Calculation of Maximum Annual Water Allotment

(a) The maximum annual water allotment for an existing turf-related facility shall be determined as

follows:

(i) Determine the total landscaped area of the facility and the newly turfed area of the facility. Subtract the newly turfed area from the total landscaped area. Multiply the result by the water application rate of 5.0 acre-feet per acre.

(ii) Multiply the newly turfed area of the facility by the water application rate of 6.0 acre-feet per acre.

(iii) Determine the total water surface area of the facility. Multiply the total water surface area by the water application rate of 5.8 acre-feet per acre.

(iv) The sum of the results of the calculations in subdivisions (i), (ii) and (iii) of this subparagraph is the maximum annual water allotment for an existing turf-related facility.

(b) Except as provided in subparagraph (c) of this paragraph, the maximum annual water allotment for a new turf-related facility shall be determined as follows:

(i) Determine the total landscaped area of the facility and the newly turfed area of the facility. Subtract the newly turfed area from the total landscaped area. Multiply the result by the water application rate of 4.8 acre-feet per acre.

(ii) Multiply the newly turfed area of the facility by the water application rate of 5.8 acre-feet per acre.

(iii) Determine the total water surface area of the facility and the water surface area of any body or bodies of water filled and refilled with effluent. Subtract the water surface area of any body or bodies of water filled and refilled with effluent from the total water surface area. Multiply the result by the water application rate of 4.8 acre-feet per acre.

(iv) Multiply the water surface area of any body or bodies of water filled and refilled with effluent by the water application rate of 5.8 acre-feet per acre.

(v) The sum of the results of the calculations in subdivisions (i), (ii), (iii) and (iv) of this subparagraph is the maximum annual water allotment for a new turf-related facility.

(c) The maximum annual water allotment for a golf course that qualifies as a new turf-related facility and has a total landscaped area in excess of the result obtained by multiplying the number of regulation holes by five acres shall be determined as follows:

(i) Multiply the number of regulation holes by five acres. Subtract from that result the newly turfed area of the facility. Multiply the result by the water application rate of 4.8 acre-feet per acre.

(ii) Multiply the newly turfed area of the facility by the water application rate of 5.8 acre-feet per acre. In no case shall the allotment for the newly turfed

area exceed the result obtained by the following formula: Multiply the number of regulation holes by five acres and multiply that result by the water application rate of 5.8 acre-feet per acre.

(iii) Determine the water surface area of any body or bodies of water filled and refilled with effluent. Multiply that water surface area by the water application rate of 5.8 acre-feet per acre.

(iv) The sum of the results of the calculations in subdivisions (i), (ii) and (iii) of this subparagraph is the maximum annual water allotment for a golf course that qualifies as a new turf-related facility and has a total landscaped area in excess of the result obtained by multiplying the number of regulation holes by five acres.

(d) Where a turf-related facility consists of an existing turf-related facility and a new turf-related facility that are contiguous, under one ownership and operated as one facility, the facility may combine the maximum annual water allotment for the existing turf-related facility and the maximum annual water allotment for the new turf-related facility and may apply all or a portion of the aggregate annual water allotment to any part of the facility.

(2) Compliance with Maximum Annual Water Allotment

A turf-related facility is in compliance for a given calendar year with the applicable maximum annual water allotment if the Director determines that either of the following applies:

(a) The aggregate amount of water from any source used by the facility for turf-related watering purposes during the calendar year does not exceed the applicable maximum annual water allotment.

(b) The aggregate amount of water from any source used by the facility for turf-related watering purposes during the calendar year and the preceding two calendar years does not exceed the sum of the maximum annual water allotments for those three years.

(3) Effluent Use

An existing turf-related facility or a new turf-related facility that is or will be using effluent may apply to the Director for a modification of a water application rate. The Director may approve a modification of a water application rate if the owner or operator of the facility demonstrates to the satisfaction of the Director that technical difficulties caused by the use of effluent justify a modification.

8. Conservation Requirements for Municipal Distribution Systems

a. Conservation Requirements for Existing Municipal Distribution Systems

(1) Water Loss Survey

Except as provided in paragraph 8.a(2) of

this Notice, a municipal provider that owns or operates an existing municipal distribution system shall submit a water loss survey to the Director no later than July 1, 1987. The water loss survey shall be made on a form prescribed and furnished by the Director which shall include the following information for calendar year 1986:

(a) An estimate of the quantity of lost water during the year. The quantity of lost water shall be determined by a generally accepted engineering method.

(b) The quantity of authorized deliveries during the year accounted for by metered water deliveries.

(c) The total quantity of authorized deliveries during the year accounted for by generally accepted methods of estimating water use.

(d) A breakdown by type of use of the total quantity of authorized deliveries during the year accounted for by generally accepted methods of estimating water use and a description of the methods employed to estimate water use.

(e) The estimated percentage of the total quantity of water from any source withdrawn, diverted or received by the municipal provider during the year that is lost water.

(f) The estimated percentage of the total quantity of water from any source withdrawn, diverted or received by the municipal provider during the year that is unaccounted for water.

(2) Exemption from Water Loss Survey

(a) A municipal provider that owns or operates an existing municipal distribution system, serves less than 500 people as of January 1, 1986, and whose annual report for calendar year 1985 demonstrates to the satisfaction of the Director that the total quantity of lost and unaccounted for water during that year is equal to or less than 15% of the total quantity of water from any source withdrawn, diverted or received during that year is exempt from the water loss survey requirements in paragraph 8.a(1) of this Notice.

(b) A municipal provider that owns or operates an existing municipal distribution system and serves 500 or more people as of January 1, 1986 may apply to the Director no later than July 1, 1986 for an exemption from the water loss survey requirements prescribed in paragraph 8.a(1) of this Notice. The application shall be made on a form prescribed and furnished by the Director. The Director may approve an exemption if the applicant demonstrates to the satisfaction of the Director that all of the following apply:

(i) The applicant can accurately determine the total quantity of water from any source withdrawn, diverted or received during calendar year 1985.

(ii) The applicant has implemented an effective testing and replacement program for all water measuring devices used to determine the total quantity of water from any source withdrawn, diverted or received by the applicant and the total quantity of measured deliveries by the applicant of

water from any source.

(iii) The total quantity of lost and unaccounted for water during calendar year 1985 is equal to or less than 10% of the total quantity of water from any source withdrawn, diverted or received by the applicant during the calendar year.

(3) Water Loss Reduction Plan

Except as provided in paragraph 8.a(4) of this Notice, a municipal provider that owns or operates an existing municipal distribution system shall submit a water loss reduction plan to the Director no later than January 1, 1988. The water loss reduction plan shall include a schedule of system repairs or modifications, or both, designed to reduce, as expeditiously as economically reasonable, the total quantity of lost and unaccounted for water to the applicable percentage of the total quantity of water from any source withdrawn, diverted or received by the municipal provider. If the municipal provider serves less than 500 people as of January 1, 1986, the applicable percentage is 15%. If the municipal provider serves 500 or more people as of January 1, 1986, the applicable percentage is 10%. Each municipal provider required to submit a water loss reduction plan shall begin implementation of an approved plan no later than July 1, 1988.

(4) Exemption from Water Loss Reduction Plan

(a) A municipal provider that owns or operates an existing municipal distribution system is exempt from the water loss reduction plan requirements prescribed in paragraph 8.a(3) of this Notice if any one of the following applies:

(i) The water loss survey submitted by the municipal provider pursuant to paragraph 8.a(1) of this Notice demonstrates to the satisfaction of the Director that the total quantity of lost and unaccounted for water during calendar year 1986 is equal to or less than the applicable percentage of the total quantity of water from any source withdrawn, diverted or received by the municipal provider during that year. If the municipal provider serves less than 500 people as of January 1, 1986, the applicable percentage is 15%. If the municipal provider serves 500 or more people as of January 1, 1986, the applicable percentage is 10%.

(ii) The municipal provider is exempt from the water loss survey requirements pursuant to subparagraph 8.a(2)(a) of this Notice.

(iii) The Director has exempted the municipal provider from the water loss survey requirements pursuant to subparagraph 8.a(2)(b) of this Notice.

(b) A municipal provider that owns or operates an existing municipal distribution system and pursuant to subparagraph (a) of this paragraph is exempt from the water loss reduction plan requirements prescribed in paragraph 8.a(3) of this Notice shall operate and maintain its municipal distribution system in such a manner that, for the first full calendar year after the compliance date and for each succeeding calendar year until the effective date of any applicable

conservation requirements prescribed in the second management plan, the total quantity of lost and unaccounted for water is equal to or less than the applicable percentage of the total quantity of water from any source withdrawn, diverted or received during the year by the municipal provider. If the municipal provider serves less than 500 people as of January 1, 1986, the applicable percentage is 15%. If the municipal provider serves 500 or more people as of January 1, 1986, the applicable percentage is 10%.

b. Conservation Requirements for New Municipal Distribution Systems

A new municipal distribution system shall be constructed, operated and maintained in such a manner that, for the first full calendar year that falls after the compliance date and after the system reaches 50% of its design capacity and for each succeeding calendar year until the effective date of any applicable conservation requirements in the second management plan, the total quantity of lost and unaccounted for water during the year is equal to or less than 10% of the total quantity of water from any source withdrawn, diverted or received by the municipal provider during the year.

9. Monitoring and Reporting Requirments

a. A municipal provider shall separately measure and report in its annual reports required by A.R.S. § 45-632:

(1) The total quantity of water from any source withdrawn, diverted or received annually.

(2) The total quantity of water from any source delivered annually to irrigation and non-irrigation uses.

(3) The quantity of water from any source, except effluent, delivered annually to residential uses.

(4) The quantity of water from any source, except effluent, delivered annually to non-residential uses.

(5) The quantity of water from any source delivered annually to each turf-related facility served by the municipal provider.

b. A municipal provider shall report in its annual reports required by A.R.S. § 45-632:

(1) The number of dwelling units served.

(2) For each existing turf-related facility and new turf-related facility served by the municipal provider:

(a) The total landscaped area.

(b) The newly turfed area.

(c) The total water surface area.

(3) For each new turf-related facility served by the municipal provider, the water surface area of any body or bodies of water filled and refilled with effluent.

(4) The total quantity of lost and unaccounted for water during the year.

(5) The percentage of the total quantity of water from any source withdrawn, diverted or received annually that is lost and unaccounted for water.

c. All measurements required by subsection a of this section shall be made with a measuring device approved under A.C.R.R. R12-15-903 of the Department's Water Measuring Rules, and installed and operated in accordance with the accuracy criteria in A.C.R.R. R12-15-904 of those Rules.

MEASURING DEVICE MALFUNCTION

Pursuant to A.C.R.R. R12-15-905, a measuring device that fails to perform for more than seventy two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken as soon as practicable, and estimates of withdrawals made during the period the device was out of service must be provided. A Measuring Device Malfunction Report is available on request.

INSTRUCTIONS

Irrigation Grandfathered Right Holders - Use Part A for all water received from an irrigation district. Spill water will not be charged to your flexibility account. The amount of effluent and surface water charged to your flexibility account may differ from the amounts actually received. Contact DWR for more information.

Municipal Providers - Use Part A for the water received from an irrigation district, including CAP water from an irrigation district. Use Part B for CAP water received from CAWCD or from another municipal provider. Spill water and effluent will not be used to determine compliance with your GPCD target.

Type 1 Rights - Do not report sources other than groundwater. If you receive groundwater from a source other than an irrigation district, the amount of water received from each well must be reported.

Type 2 Rights and Groundwater Withdrawal Permits - Do not report sources other than groundwater. The amount of groundwater received from each well must be reported. Any well used must be reported. Any well used must be listed on your Type 2 certificate or groundwater withdrawal permit.

PART A - WATER RECEIVED FROM IRRIGATION DISTRICTS

READ INSTRUCTIONS CAREFULLY

1. Enter DWR Well Registration No. & Location.

DWR WELL REGISTRATION NO.	LOCATION Q	Q	Q	Sec	Twn	Rng
55-605197	SE	SE	SW	1	13S	13E

2. Enter type, make & model of measuring device used to measure flow. If measuring device is permanent, enter date installed or last overhauled.

TYPE OF MEASURING DEVICE	MAKE
Totalizer	Rockwell
MODEL	SIZE 3"
UNITS MEASURED Gallons	INSTALLATION OR OVERHAUL DATE ← 7-26-91

3. Enter Power Co. Name, Account No., Meter No. and total energy consumption. Indicate units as KWH, therms or other measurement.

POWER CO. NAME	ACCOUNT NO.	POWER METER NO.
TEP	144249921	AA588

ENTER TOTAL ENERGY CONSUMPTION IN COLUMN 6 OF SCHEDULE A	ENERGY CONSUMPTION	UNITS
	146,702	Kwh

→4. Does Energy Meter serve uses other than the well pump? ☐ YES ☑ NO
Enter "Y" or "N" in column 7 of Schedule A

5. Enter water reading as of January 1, in (5). If your meter reads in 10s, 100s, or 1000s of units, be sure to add the correct number of zeros.

6. Enter ending reading as of December 31, in (6). If the totalizer dial has rolled over during the year, enter the number 1 in front of the reading, if twice, a 2, etc.

7. Subtract reading in (5) from reading in (6) and enter the difference in (7).

WATER TOTALIZING METER READINGS		
(5) INITIAL	→ (6) ENDING	(7) DIFFERENCE
80,519,100	194,589,000*	16,555,458

97,075,589 - adjusted ending reading

If meter was replaced during the year, indicate beginning and ending reading for each meter.

* Meter was malfunctioning - accelerated readings

8. Convert the Total Amount Pumped to acre feet by using the appropriate conversion.

- If meter reads in gallons, divide (7) by 325,851 and enter the result below.
- If meter reads in cubic feet, divide (7) by 43,560 and enter the result below.
- If meter reads in acre-feet, no conversion is necessary.

ACRE FEET	50.81

9. If your meter malfunctioned during the year, enter the estimate of withdrawals in acre-feet made during the out-of-service period, as indicated on Meter Malfunction report.

BREAKDOWN ESTIMATE	30.51

10. Add (8) and (9) and enter result below and in column 4 of Schedule A for each well measured.

TOTAL IN ACRE-FEET	81.32

THIS WORKSHEET MUST BE SUBMITTED WITH SCHEDULE A

ORIGINAL, RETURN TO ADWR

ARIZONA DEPARTMENT OF WATER RESOURCES

FIFE SYMINGTON
Governor

RITA P. PEARSON
Director

January 15, 1997

Dear Provider:

Enclosed are your Annual Water Withdrawal and Use Report forms for calendar year 1996. These forms are printed on the reverse side of this letter. This report is for service area right holders who withdraw groundwater from their own wells, who may receive water from others, and who may deliver water to other right holders or individual users. The Department has preprinted certain information from our records onto these forms. Please pay particular attention to schedules and worksheets. If any of the preprinted information is incorrect, please make the necessary changes. Please note that a separate annual report must be filed for each right you own or lease. Separate checks should be enclosed to cover the fees associated with each right and the right number should be written on the check.

The Groundwater Code requires that each person who owns a right to withdraw groundwater in an **Active Management Area** must file an annual report, even if no groundwater was used. Persons who did not withdraw water during 1996 are required to return the forms with zeros in the appropriate blanks.

Reports must be received by the Department or postmarked no later than March 31, 1997. The penalty for filing late is $25.00 per month or part of a month that the report is late up to $150.00. In additon, if you withdrew groundwater, and did not pay the fee on time or did not pay the proper fee, the penalty is 10% of the unpaid fee per month or part of a month that the fees are delinquent, up to a maximum of 60% of the unpaid balance.

If your water right has been sold, both the buyer and seller are responsible for notifying the Department of the conveyance. **The owner of the right as of December 31, 1996 is reponsible for filing an annual report covering the entire calendar year.** Please contact your AMA office for conveyance forms and instructions.

We have tried to provide you with the proper forms according to information in our files. The law does specify, however, that failure to receive the proper forms does not relieve a person of the responsibility of keeping the required records or filing the required reports. You may want to copy this report for your records.

If you need help or have questions, contact your AMA office listed on the Summary page of your report.

Sincerely,

Jim Holway

INSTRUCTIONS

If any information pre-printed on this form is incorrect, please make the needed corrections. For that information not already preprinted on this form, please follow the directions below.

Enter owner name and groundwater right number, if not already shown, in [1]

Enter DWR well registration number and location of each well, if not already shown, in [2]

Enter power company name, account number and meter number, if not already shown, in [3]

Enter device type used to measure withdrawals, if not already shown, in [4] (see list below).

If energy meter serves uses other than the well, indicate "Y" in [5]; if energy meter does not serve other uses (meter is dedicated to the well) indicate "N" in [5]

Enter energy consumed by well and units of measure from appropriate worksheet in [6]

If device types 2 through 6 are used, indicate the average discharge and divider or total hours from the appropriate worksheet in [7] and [8]

Enter total acre-feet of groundwater withdrawn for each well, as calculated on attached worksheets, in [9]

Enter grand total acre-feet withdrawn in [10] and in Part I of the Summary Page.

DEVICE TYPE

1. Pumpage measured by meter or other totalizer/recorder devices (use worksheet W-1)
2. Pipeflow with pumpage calculated using electrical energy records (use worksheet W-2)
3. Pipeflow with pumpage calculated using natural gas energy records (use worksheet W-3)
4. Open channel flow with pumpage calculated using electrical energy records (use worksheet W-4)
5. Open channel flow with pumpage calculated using natural gas energy records (use worksheet W-5)
6. Pumpage calculated using hour meters (use worksheet W-6)

MEASURING DEVICE MALFUNCTION

Pursuant to A.C.R.R. R12-15-906, a measuring device that fails to perform for more than seventy two (72) hours must be reported to the Department of Water Resources within seven (7) calendar days after the discovery of the malfunction. Corrective action must be taken within 30 days, and estimates of withdrawals made during the period the device was out of service must be provided. A Measuring Device Malfunction Report is available on request.

NOTE: A WORKSHEET MUST BE ATTACHED FOR EACH WELL FROM WHICH WATER WAS WITHDRAWN.

INSTRUCTIONS

If any information pre-printed on this form is incorrect, please make the needed corrections. For that information not already pre-printed on this form, please follow the directions below.

Irrigation Grandfathered Right Holders - Use Part I for all water received from an irrigation district. Spill water will not be charged to your flexibility account. If you have any questions regarding your flexibility account, contact DWR for more information.

Municipal Providers - Use Part I for the water received from an irrigation district, including CAP water from an irrigation district. Use Part III for CAP water received from CAWCD or from another municipal provider. Spill water and effluent will not be used to determine compliance with your GPCD target.

Type 1 Rights - Do not report sources other than groundwater. If you receive groundwater from a source other than an irrigation district, the amount of water received from each well must be reported. Other sources of water need to be reported on a supplemental schedule.

Type 2 Rights and Groundwater Withdrawal Permits - Do not report sources other than groundwater. The amount of groundwater received from each well must be reported. Any well used must be reported. Any well used must be listed on your Type 2 certificate or groundwater withdrawal permit. Other sources of water need to be reported on a supplemental schedule.

WORKSHEET W-1

ARIZONA DEPT. OF WATER RESOURCES

PUMPAGE MEASURED BY METER OR OTHER TOTALIZER RECORDER DEVICES

INSTRUCTIONS

1. Enter DWR Well Registration No. & Location in [1].

2. If the meter has been changed during the reporting year, enter type, make, model & size of measuring device used to measure discharge in [2]. If the device is permanent, enter date installed or last overhauled.

3. Enter power company name, account number, meter number and total energy consumption in [3]. Indicate units as KWH, therms or other measurement.

4. Indicate whether the energy meter serves other uses in [4].

5. Enter initial totalizer reading as of January 1, in [5]. If your meter reads in 10's, 100's, or 1000's of units, be sure to add the correct number of zeroes.

6. Enter ending reading as of December 31, in [6]. If the totalizer dial has rolled over during the year, enter the number 1 in front of the reading, if twice, a 2, etc.

7. Subtract reading in [5] from reading in [6] and enter the difference in [7].

8. Convert the Total Amount Pumped to acre feet by using the appropriate conversion; enter the result in [8].
   - If meter reads in gallons, divide [7] by 325,851 81,43.
   - If meter reads in cubic feet, divide [7] by 43,560
   - If meter reads in acre-feet, no conversion is necessary

9. If your meter malfunctioned during the year, enter the estimate of withdrawals in acre-feet made during the out-of-service period in [9] and attach the results of the two required flow rate measurements.

10. Add [8] and [9] and enter result in [10].

ENTER THE FOLLOWING ON SCHEDULE A OR PART I OF SCHEDULE A-GSF

WORKSHEET		SCHEDULE A
Item 1	–	DWR Well Reg No. & Location in Col [2], if not already shown.
Item 3	–	Power Co. Name, Acct. No. and Meter No. in Col [3] and Total Energy Consumption in Col [6].
Item 4	–	Meter Serves other uses "Y" or "N" in Col [5].
Item 10	–	Groundwater withdrawn in Col [9].

THIS WORKSHEET MUST BE SUBMITTED WITH SCHEDULE A OR A-GSF.

RECEIVED
MAR 18 1997
RECORDS MGT

ORACLE VILLA

Well Number 56-000324.0000

For periods - meter not working:

Electric usage

May -	18,400	
October -	13,440	
November -	11,360	
December -	13,520	
	56,720	Total KWH used while meter not operating.

Total metered ground water withdrawal in 1996 = 143,280 KWH for 81.43 acre feet, which gives an average 1,759.55 KWH per acre foot of water.

56,720 KWH divided by 1,759.55 = 32.24 acre feet of water during unmetered time

ARIZONA DEPARTMENT OF WATER RESOURCES
1996 ANNUAL WATER USE REPORT
SCHEDULE F-1
SMALL WATER PROVIDER

RECEIVED
MAR 18 1997
RECORDS MGT

RIGHT NUMBER: 56-000 324,0000
PROVIDER NAME: ORACLE VILLA APTS.
CONTACT PERSON: Rita Herbert
PHONE NUMBER: 520 297 6141

Pursuant to Section 5-113 of the Second Management Plan (SMP) for the Tucson Active Management Area, small municipal water providers (those that supply 250 acre-feet/year or less) are required to supply the following information. **Please contact the Tucson AMA at 770-3800 if assistance is needed.**

PART 1 - DELIVERIES TO USE GROUPS

Please indicate the total quantity of water delivered *(both metered and unmetered)* to each of the following user groups for 1996.

a. Residential - include all uses of water related to service of residences *(housing units)* including both interior and exterior water use. This should include deliveries to multi-family housing complexes through master meters.

Metered ✓ acre-feet
Unmetered ✓ acre-feet Total 113.67 acre-feet

b. Non-residential - include all water delivered for purposes other than residential, including turf-related facilities *(item d below)*. **Do not include effluent or deliveries to irrigation rights or other service area rights.**

Metered _____ acre-feet
Unmetered _____ acre-feet Total _____ acre-feet

c. Total deliveries *(add amounts in a and b above)* _____ acre-feet

d. Turf-related facilities - include all *non-effluent* water delivered to facilities with ten or more acres of turf. These deliveries should be included in non-residential use *(item b above)*. Please note that a Schedule G-2 must also be submitted for each turf-related facility receiving water from your system in 1996.

_____ acre-feet

e. Total effluent deliveries *(not included in GPCD or lost water calculations)* _____ acre-feet

Unmetered deliveries must be calculated using a generally accepted method of estimating water use. Explain below how any unmetered deliveries were calculated:

(1) Took total meter (elec) reading for entire period meter worked — ÷ by total Acre Feet Withdrawn - used that number as multiplyer for KWH used during 1 week period meter not working.
(2) 1 month well completely down used actual usage from metered water.

1996 SERVICE AREA MAP UPDATE

Provider Name: Oracle Villa

Provider Number: 520-297 6141

According to A.R.S. 45-498 of the Arizona Groundwater Management Act, each city, town, private water company and irrigation district within an Active Management Area is required to maintain an accurate and current map delineating its service are and water distribution system.

If your service area boundaries or operating distribution system have not changed since January 1, 1996, indicate this below. If your service area boundaries or operating distribution system have changed since January 1, 1996, indicate this below and submit two copies of your revised service area map with your 1996 Annual Water withdrawal and Use Report no later than March 31, 1997. A duplicate copy of the service area map submitted to the Department shall be kept on file at your office.

Maps must be drawn to a scale of 1:31680 (2 inches to the mile) or larger and must contain all of the elements listed below:

1. The principal features of the operating distribution system including wells, water treatment plants, pumping stations, reservoirs and storage tanks, canals and water mains of a diameter greater than or equal to four (4) inches.

2. The diameter and linear miles of the mains and the capacity of other features of the operating distribution system.

3. The location and names of major streets which carry traffic through and around the service area.

4. Notations of the legal description of the area covered by the service area map. Such notations should include on the borders of the map the township(s) and range(s) covered by the map. Within the body of the map indicate the section(s) covered by the map.

5. Each map must be dated and signed by an authorized representative.

✓ Service area boundaries and operating distribution system have not changed since January 1, 1996.

____ Service area boundaries or operating distribution system have changed since January 1, 1996. (Two copies of the revised map must be submitted with your annual report.)
