Funding Sources

Water Research Foundation

- **Integrated Water Management: Planning for Future Water Supplies**
  By 2019, enhance water utility implementation of integrated water management and water supply diversification. Provide data, tools, and knowledge to support water supply diversification efforts through an integrated water management approach; improve water supply planning to be more integrated, resilient, and reliable; and evaluate how new water supplies from nontraditional sources can be protective of public and environmental health. **Emergent opportunities (partnerships) 50/50 Match $100,000.**

  Getting utilities involved:
  - City of Avondale Avondale AZ
  - City of Chandler Chandler AZ
  - City of Flagstaff Flagstaff AZ
  - City of Glendale Water Services Glendale AZ
  - City of Phoenix Water Services Department Phoenix AZ
  - City of Scottsdale - Water Resources Dept ScottsdaleAZ
  - City of Tempe Tempe AZ
  - Salt River Project Phoenix AZ
  - Tucson Water Tucson AZ

Bureau of Reclamation

- **Water Management and Conservation Plans** provide entities an opportunity to document data on current water supply and demand, prepare a forecast for future water demands, identify water conservation goals, and determine conservation measures (e.g., cost/pricing of water, water accounting, landscape efficiency, information and education, water use regulation). **50/50 Match $100,000.**

Arizona Department of Water Resources

- **The Rural Water Studies** fund was established to assist Rural Arizona Watershed partnerships and watershed groups with the funding of projects and studies pertaining to the understanding, planning, management, and enhancement of water supplies in rural Arizona. Funding is authorized annually by the State Legislature. Requests for funding are reviewed by the Department when funds are available. Watershed partnerships and/or watershed groups include local stakeholders and representatives of resource and regulatory agencies that are active in rural areas.
