Agenda

1. Welcome and Introductions
2. Background Information and Mitigation Strategies Discussion
3. Initiating Procedures to Designate an Active Management Area via Petition Presentation
4. Industrial Water Demand Projections Presentation
5. Agricultural Water Demand Presentation
6. General Comment Period
7. Closing Remarks
Arizona Water Initiative Update

• Governor's Water Augmentation Council
  ▪ The Council last met on April 7, 2017
  ▪ The following was discussed:
    • Arizona Water Initiative annual report
    • Planning Area Process update
  ▪ Three West Basins stakeholders attended, two of which addressed the Council during the public comment period

• Northwest Basins Planning Area
  ▪ Last met on February 28, 2017
  ▪ The following was discussed:
    • Municipal, Industrial, and Agricultural Water Demand
    • Ways in which groundwater regulation is developed
    • Components of Active Management Areas

GOVERNOR DOUG DUCEY’S ARIZONA WATER INITIATIVE

On October 5, 2015, Governor Ducey announced his water planning initiative for the state. The Arizona Water Initiative is based off of and continues the work published in the 2014 Strategic Vision for Water Supply Sustainability Report, which identified key priorities, timelines, and action items needed to maintain sustainable water supplies for Arizona’s future. The Arizona Water Initiative was implemented with the signing of Executive Order 2015-13 on December 16, 2015. Through this initiative, the Arizona Department of Water Resources (ADWR) will work closely with key stakeholders statewide on two parallel tracks.

Annual Report (2016)
Arizona Water Initiative Fact Sheet

PLANNING AREA PROCESS

Through the Planning Area Process, ADWR will identify and prioritize the 22 planning areas identified in the Strategic Vision for Water Supply Sustainability.

GOVERNOR’S WATER AUGMENTATION COUNCIL

The Council will investigate the long-term augmentation strategies for the State, as well as explore additional actions and policies necessary to ensure a sustainable water supply for Arizona’s future.
PLANNING AREA PROCESS

The goal is to address all 22 planning areas within the next 5 years. In year one, ADWR is working with the Northwest Basins, West Basins, and Cochise planning areas. ADWR is currently working on developing a schedule for remaining planning areas.

Click on highlighted area to see meetings for that planning area.
Report your water resources concerns to ADWR
