# SCHEDULE G - 2

## INSTRUCTIONS - TURF-RELATED FACILITIES

Note: If any information pre-printed on this form is incorrect, please make the needed corrections.  
For any information not already pre-printed on this form, please follow the directions below.

Enter facility name, owner name, contact person name, contact address and phone number if not already shown.

### PART 1 - TURF-RELATED WATER USE

Indicate the amount of water from any source withdrawn or diverted by you or received from another entity (e.g., an irrigation district, municipal provider or CAWCD) used for landscape-related watering in calendar year 2012. The quantity of recovered water used by a turf-related facility must be reported. Enter the type and quantity of water recovered.

**Metered Water Used for Purposes Other Than Turf-Related Water Use:** Enter any water use for a purpose other than landscape watering (such as clubhouse use, equipment washing, nursery or swimming pool) that has been separately measured. If separately measured, this amount may be subtracted from the sub-total of water used. Meter readings may be submitted on a separate sheet if necessary along with purpose of water.

Note: Any water used by the facility for a purpose other than landscape watering that is not measured separately from the water used for landscape watering shall be counted as water used by the facility for landscape watering for the purpose of calculating the facility's compliance with its maximum annual conservation allotment.

### PART 2 - TOTAL LANDSCAPED AND WATER SURFACE AREA

If any overseeding occurred during the year, enter the total acres or percent of turf acreage that has been overseeded. If acreage changed in 2012, your facility is required to submit documentation, providing exact acreage for turf, low water using landscape and water surface areas. The Department will accept the following methods for verifying acreage calculations:

1. A certified engineer's report with an accurately scaled facility map keyed to the report; or
2. An accurately scaled as-built plan of the facility with all landscaped areas and water bodies clearly identified; or
3. An accurately scaled as-built plan of the facility with all landscaped areas and water bodies clearly identified and accompanied by an aerial photograph at the same scale; or
4. Acreage calculations that have been physically measured with a measuring wheel or other measuring device and that are keyed to an accurately scaled map.

#### Golf courses:

- Shall individually delineate all holes at their facility.
- Provide the total length of the course as measured from the back of the tee furthest from the green, down the centerline of the hole to the center of the green.

\*\*\* Water use records should be maintained for a minimum of three (3) years.

Please contact the Annual Reports & Planning Section if you need assistance completing this form.
