PUBLIC EDUCATION PROGRAM

You may attach additional pages, information, or materials.

1. Communication to Customers: Describe how you communicated to customers (at least twice per year) about the importance of conservation and the availability of water conservation information. Please include the following information:

- The way messages are provided, such as on water bills, bill inserts, newsletters, websites, etc.
- How often the communication channel was used
- Number of customers reached (or an estimate)
- What worked and what will be modified or discontinued
- Plans for the current calendar year

We put messages on bills monthly, insert a newsletter quarterly with our bills, and update our website periodically. We estimate that with all of these options, we can reach the majority of our 2,500 connections. We will continue to

inform our customers via newsletters and our website that we have low flow faucets and showerheads, can perform water audits at their residences, and have conservation materials available for them.

2. Written Materials: Describe the free written conservation information you provided to customers. Include where available and your plans for the current calendar year. Please include the following information:

- Brief description of materials available
- How customers obtain the information, e.g. mailed upon request; available in office, etc.
- Locations where available
- Plans for the current calendar year

We have many different pamphlets available in our lobby that range from water conservation, to leak detection, and xeriscapes. They can be picked up or request to have them mailed to them. Every new customer that comes in is given an entire packet with all of the information mentioned above. We also have an Annual Meeting in November and community fair in the spring where we set up a table with all of our information and supplies that is available to all of our customers and others throughout the Picture Rocks community.
