Gentlemen:

The Department of Water Resources issued drilling authority approximately a year ago for the well referenced by our file number on the label at the top of the form. Our records show this well has not yet been completed.

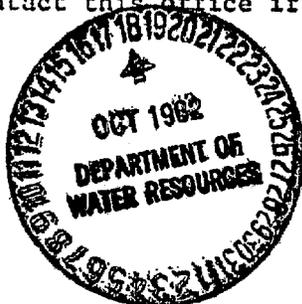

If it is your intention to complete the well, this is to advise that you must refile in order to do so. If the well has been completed, we require submission of the Log of Well and a Completion Report (if pump equipment has been installed). These forms were furnished to your driller at the time drilling authority was issued.

Arizona Revised Statute 45-600 requires the driller to furnish a complete and accurate log within 30 days of completion of drilling. It also requires the filing of a Completion Report within 30 days after the installation of pumping equipment on the well. The drilling of the well must be completed within one year from the date that we issued drilling authority. There is no time limit for you to install pump equipment.

Specifically, if the well has been completed, your well file needs the following reports to bring the well into full compliance with the law:

1. Log of the Well, *I don't have* *I guess driller does*
2. Completion Report.

We will appreciate your immediate assistance in this regard. Please, contact this office if further assistance or information is required.

Sincerely,

W. Don Maughan

Dear Well Owner:

A copy of Notice of Intention to Drill a Well is returned to you for your records. Your driller has been mailed separately a Well Drilling Card, Well Drilling Report, and a Completion Report.

ARS 45-600 requires the driller to furnish this Department a complete and accurate log of the well within 30 days of completion of drilling, and a Completion Report within 30 days after installation of pumping equipment.

Also enclosed for your future use is a Change of Well Information Form. Per ARS 45-593, the person to whom a well is registered shall notify this Department of a change in ownership of the well and information pertaining to the physical aspects of the well to keep the well registration record current and accurate.

In the event it is necessary to change the location of the proposed well, you should obtain the written permission of the Department of Water Resources before proceeding with the drilling.

Very truly yours,

Richard A. Gessner
