COMPLETION REPORT

1. Per A.R.S. §45-600, the Completion Report to be filed with the Department within 30 days after installation of pump equipment by the registered well owner.
2. Drawdown of the water level for a non-flowing well should be measured in feet after not less than 4 hours of continuous operation and while still in operation and for a flowing well the shut-in pressure should be measured in feet above the land or in pounds per square inch at the land surface.
3. The static groundwater level should be measured in feet from the land surface immediately prior to the well capacity test.
4. The tested pumping capacity of the well in gallons per minute for a non-flowing well should be determined by measuring the discharge of the pump after continuous operation for at least 4 hours and for a flowing well by measuring the natural flow at the land surface.

LOCATION OF THE WELL:

1N Township 4E Range 5 Section SW NW-NE-NW
1/2 of 1/2 of 1/2

EQUIPMENT INSTALLED:

Kind of pump CENTRIFUGAL
Turbine, centrifugal, etc.

Kind of power ELECTRIC H.P. Rating of Motor 5
Electric, natural gas, gasoline, etc.

Pumping Capacity 25 Gallons per minute Date installed SEPT. 1983
PUMP INSTALLED FOR PUMPING TEST, THEN REMOVED & WELL WAS CAPPED.

WELL TEST:

Test pumping capacity 24.8 Gallons per minute Date Well Tested SEPT. 27-29, 1983

Method of Discharge Measurement CURRENT METER
Weir, orifice, current meter, etc.

Static Groundwater Level 24.18 ft. Drawdown 4.10 ft.
Total Pumping Lift 28.28 ft. Drawdown _____ lbs
(Flowing Well)

DEPARTMENT OF WATER RESOURCES
NOTICE OF INTENTION TO DRILL OR DEEPEN
AN EXEMPT WELL

EXEMPT WELL

Section 45-596, Arizona Revised Statutes, provides: A person may not drill or cause to be drilled any well or deepen or replace an existing well without first filing a Notice of Intention to Drill with the Department on a form prescribed and furnished by the Department. The well shall be completed within one year after the date of Notice. An exempt well means a well having a pump with a maximum design capacity of not more than 35 gallons per minute which is used to withdraw groundwater. An exempt well may include the non-commercial irrigation of less than 2 acres of land.

- Indicate Well Location by X

Re: Notice of Intention to Drill Registration No. 55-505950
and 55-505951

Dear Mr. Gutierrez:

By this letter we are transmitting documents relating to the drilling of the referenced two wells. These wells are being approved for drilling as exploration wells for monitoring purposes under the provisions of draft Rule R12-15-802.

Authority is granted under the conditions which you stated in your letter of July 25, 1983, namely:

1. Each well will be limited to a pump design capacity of not more than 35 gallons per minute.
2. Pumping from each well will be limited to approximately 72 hours at a time and will be limited to a total of approximately 150,000 gallons per test (each time).
3. Testing will be limited to a total of 3 tests of approximately 72 hours.
4. Current planning would expect to withdraw a total of less than 3 acre feet from both wells, but in no case may more than 10 acre feet be totally withdrawn.
5. Testing must be completed within one year. If testing beyond the conditions listed above or for a duration greater than a year, the applicant will so notify this Department to obtain additional authorization.
6. The wells are to be abandoned within 5 years and in accordance with the provisions of Rule R12-15-816 and so reported.

Sincerely,

Richard A. Gessner
Chief, Operations Division

Subject: The Motorola, Inc. Application for Two Exempt Wells at the Same Location

Gentlemen:

In response to our meeting on Thursday, July 19, 1983, we hereby submit the information you requested.

1. Pump Capacity - The pumps will be designed to pump a maximum of 35 gallons per minute.
2. Length of time pumping is to be done - Each well will be tested two to three times. Each test will consist of withdrawing approximately 150,000 gallons totally per test. This is exclusive of any cleanout of the well for well development, which is expected to be substantially less. Each test will consist of approximately 72 hours of pumping.
3. Pumping operation - The wells will be pumped intermittently for testing. Testing is expected to be done the last week in July or the first week in August.
4. Disposal of water - The water will be disposed of into the storm drains or the sewers after it is tested to insure that it meets all discharge standards.
5. Amount to be withdrawn - The maximum expected withdrawal will be less than 10 acre feet. Based on our present plan for testing, we would expect to withdraw less than 3 acre feet in total from both wells.
6. Well abandonment - It is expected that the wells will be in operation for about five years. At the time the wells are to be abandoned, the casing will be removed or capped, and the well grouted to the bottom.

Can on a string

MICROFILMED

Mr. Richard A. Gessner
July 25, 1983
Page 2

These wells individually qualify for exempt well status, because they are not for the same purpose. The 80 foot deep well is intended to test the upper region of the groundwater to determine transmissivities of the soils. The well which is to be installed down to 200 feet will not have a withdrawal capability at above 90 feet such that it will not duplicate pumping results by the 80 foot well. It will be designed to test the groundwater transmissivity at below 90 feet down to 200 foot depths. In that respect, the wells are not duplicates and are intended for separate and independent purposes.

Attached are the two exempt well permit applications and \$20 to cover the fees. Your assistance in this matter is deeply appreciated.

Sincerely,

Gilbert T. Gutierrez
President
