Re: Notice of Intention to Drill; Registration 55-506103
and 55-106104

Dear Mr. Gutierrez:

By this special letter, we are transmitting documents relating to the drilling of the referenced two wells.

These wells are being approved for drilling as exploration wells for core sampling and for monitoring purposes respectively, and under the provisions of Draft Rule R12-15-802. Authority is granted for well 55-506104 under the conditions which you stated in your letter of August 9, 1983 namely:

1. The well will be limited to a pump design capacity of 2 gallons per minute and a maximum of one sample per day will be taken.
2. The well will at no time be used to pump groundwater for any water production purpose.
3. The well will be properly abandoned in accordance with the Department's draft well standards upon completion of the monitoring project.

Authority is granted for well 55-506103 with the following understanding:

1. The purpose of drilling is to take a core sample, that no pump equipment will be installed, and that no groundwater will be withdrawn.
2. The well will be immediately abandoned and reported as such upon the completion of the project.

Sincerely,

A handwritten signature in black ink, appearing to read "R. Gessner".

COMPLETION REPORT

1. Per A.R.S. 345-600, the Completion Report to be filed with the Department within 30 days after installation of pump equipment by the registered well owner.
2. Drawdown of the water level for a non-flowing well should be measured in feet after not less than 4 hours of continuous operation and while still in operation and for a flowing well the shut-in pressure should be measured in feet above the land or in pounds per square inch at the land surface.
3. The static groundwater level should be measured in feet from the land surface immediately prior to the well capacity test.
4. The tested pumping capacity of the well in gallons per minute for a non-flowing well should be determined by measuring the discharge of the pump after continuous operation for at least 4 hours and for a flowing well by measuring the natural flow at the land surface.
