Re: Request for Variance

Dear Mr. Escamillo:

We are in receipt of your letter dated June 9, 1986 requesting a construction variance for 7 piezometer wells. This letter constitutes our approval as described below.

The requirement to incorporate 20 feet of steel surface casing with 1 foot extending above grade is waived. Instead, 2" PVC casing may be used with the required grout seal, and the casing may terminate below ground level with a steel water tight vault constructed around the well. Also, a water tight cap shall be provided for the 2" P.V.C. casing.

If you have any questions, please call me.

Sincerely,

Robert K. Fifield

Re: Request for Variance

Ref. No. 2176J181

Dear Sirs:

The City of Phoenix has contracted with us to install 7 pizometers at the N.W. Service Center. The location services City of Phoenix vehicles and has heavy traffic. We request a variance on the seven wells to include the following:

- The well be completed flush with the ground surface with a water tight vault and a 2' x 2' x 6" concrete pad.
- That the requirement for a 20' steel surface casing be deleted.

We thank you for your consideration.

Sincerely,

WESTERN TECHNOLOGIES INC.
Geotechnical Exploration

File No. Various
BRUCE BABBITT, Governor
WESLEY E. STEINER, Director

Dear Well Owner:

Enclosed for your records is an annotated copy of the Notice of Intention to Drill an exploration well which was recently filed with this Department. This is returned to you as evidence of compliance with A.R.S. §45-596. Your designated driller has been mailed separately a Well Drilling Card which he is required to have in his possession before commencing to drill the well.

Since this well is being drilled as a monitor well, or for cathodic protection, grounding, geotechnical or piezometer purposes, our standard driller report form is also being furnished to the driller which he is required to complete and return to the Department within 30 days after the completion of drilling. A Completion Report form is being furnished for monitor wells where pump equipment is authorized to be installed as part of this packet so that you may submit the report within 30 days after the installation of pumping equipment on a monitor well as required by A.R.S. §45-600.

This well is authorized to be drilled for mineral exploration purposes. Because of this, no pump equipment may be installed. A Project Completion Report is being furnished your designated driller for each hole to be drilled. Your driller is required to submit this Project Completion Report within 30 days after completion of drilling. You should insist that this is done.

For monitor, geotechnical, cathodic protection, grounding and piezometer wells, you should obtain the written permission of the Department of Water Resources before proceeding with the drilling in the event that you determine it necessary to change the location of the proposed well. A properly signed amended Drilling Card must be in the possession of the driller before drilling commences at a different location than originally authorized.

For your future use, a Change of Well Information form is enclosed should it become needed. Per A.R.S. §45-593, the person to whom a well is registered shall notify this Department of a change of ownership of the well and/or information pertaining to the physical characteristics of the well, including abandonment, in order to keep the well registration file current and accurate.

Sincerely,

R. A. Gessner
