- Permit No. _____
(if issued)

DESCRIPTION OF WELL

- Total depth of hole 135' ft.
- Type of casing P.V.C.
- Diameter and length of casing 4 in. from 0 to 135, _____ in from _____ to _____
- Method of sealing at reduction points No Reduction Points
- Perforated from 95 to 135, from _____ to _____, from _____ to _____
- Size of cuts .020 Number of cuts per foot _____
- If screen was installed: Length 40 ft. Diam 4 in. Type PVC
- Method of construction Rotary
drilled, dug, driven, bored, jetted, etc.
- Date started 8-10-86
Month Day Year
- Date completed 8-15-86
Month Day Year
- Depth to water 115 ft. (If flowing well, so state.)
- Describe point from which depth measurements were made, and give sea-level elevation if available Ground Level
- If flowing well, state method of flow regulation: Static

Re: City of Phoenix N.W. Service Center
Monitoring Wells

Job No. 2186J015

Dear Sir:

On 5/20/86 Western Technologies Inc. applied for notice of intention to drill ten geotechnical borings at the City of Phoenix N.W. Service Center. The application was granted (Registration 55-514429). Seven of the ten borings were augered and sampled. The other three will not be required at this time. Our client requested that six of the geotechnical borings (auger) be completed as monitoring wells. Western Technologies Inc. applied for and received permits for a total of eight monitoring wells. At this time, we propose to complete eight monitoring wells. Six of the geotechnical borings have been completed as monitoring wells and two more will be drilled from the surface.

One of the original seven geotechnical borings is still open and has not been abandoned as required. This boring was advanced to 95 feet and has no water. We therefore request an extension of 30 days before either it becomes a monitoring well or we properly abandon it. We apologize for the delay in providing this information to you.

Sincerely,

WESTERN TECHNOLOGIES INC.

Re: Request for Variance for 5 Monitor Wells

Dear Mr. Escamillo:

We are in receipt of your letter dated June 26, 1986 requesting a construction variance for 5 Monitor Wells. This letter constitutes our approval as described below:

The requirement to incorporate 20 feet of steel surface casing with 1 foot extending above grade is waived. Instead, 4" PVC casing may be used with the required grout seal, and the casing may terminate below ground level, with a steel water tight vault constructed around the well. Also, a water tight cap shall be provided for the 4" PVC casing.

If you have any questions please call me.

Sincerely,

Robert K. Fifield

BRUCE BABBITT, Governor
KATHLEEN FERRIS, Director

Dear Well Owner:

Enclosed for your records is an annotated copy of the Notice of Intention to Drill an exploration well which was recently filed with this Department. This is returned to you as evidence of compliance with A.R.S. §45-596. Your designated driller has been mailed separately a Well Drilling Card which he is required to have in his possession before commencing to drill the well.

Since this well is being drilled as a monitor well, or for cathodic protection, grounding, geotechnical or piezometer purposes, our standard driller report form is also being furnished to the driller which he is required to complete and return to the Department within 30 days after the completion of drilling. A Completion Report form is being furnished for monitor wells where pump equipment is authorized to be installed as part of this packet so that you may submit the report within 30 days after the installation of pumping equipment on a monitor well as required by A.R.S. §45-600.

This well is authorized to be drilled for mineral exploration purposes. Because of this, no pump equipment may be installed. A Project Completion Report is being furnished your designated driller for each hole to be drilled. Your driller is required to submit this Project Completion Report within 30 days after completion of drilling. You should insist that this is done.

For monitor, geotechnical, cathodic protection, grounding and piezometer wells, you should obtain the written permission of the Department of Water Resources before proceeding with the drilling in the event that you determine it necessary to change the location of the proposed well. A properly signed amended Drilling Card must be in the possession of the driller before drilling commences at a different location than originally authorized.

For your future use, a Change of Well Information form is enclosed should it become needed. Per A.R.S. §45-593, the person to whom a well is registered shall notify this Department of a change of ownership of the well and/or information pertaining to the physical characteristics of the well, including abandonment, in order to keep the well registration file current and accurate.

Sincerely,

Handwritten signature of R. A. Gessner in black ink.

Re: Request for Variance

Ref. No. 2176J181

Dear Sirs:

The City of Phoenix has asked us to request notices of intention to drill for five additional monitoring wells at the N.W. Service Center. The location services City of Phoenix vehicles and has heavy traffic. We request a variance on the five wells to include the following:

- The well be completed flush with the ground surface with a water tight vault and a 2' x 2' x 6" concrete pad.
- That the requirement for a 20' steel surface casing be deleted.

We thank you for your consideration.

Sincerely,

WESTERN TECHNOLOGIES INC.
